RESEARCH PROJECTS TO STIMULATE YOUNG INDEPENDENT TEAMS

Call number: PN-IV-RU-SC-TE-2026-2

1. Goal

Supporting young researchers, with PhD, who have established an independent research programme, obtaining significant results in their own research domain, for the creation or strengthening of their own research team.

2. Specific objectives

- Creating a stimulating research environment that allows the development of an independent professional career for young researchers;
- Strengthening the scientific independence of young researchers and stimulating the initiation of some of their own research directions with potential scientific and socio-economic impact;
- Developing young researchers' scientific leadership skills, to coordinate and manage research projects;
- Increasing the number of researchers with visible international results;
Increasing the capacity for international collaboration and to successfully participate in European and international funding for research and innovation.

3. Conditions of participation and implementation

- The call is addressed to researchers from Romania or abroad, with achievements proved through the quality and international recognition of the obtained scientific results. If, the Project Director is active abroad at the time of contracting the project, she/he will end the activity there and will carry out their research activity in Romania, in person, at the host institution of the project accepted for funding²;
 1. Project proposals can be submitted in the following 13 scientific domains: Mathematics;
 2. Informatics, computers and information technology;
 3. Physics;
 4. Chemistry;
 5. Engineering Sciences;
 6. Materials Science;
 7. Earth and Atmospheric Sciences;
 8. Biology;
 9. Health;
 10. Biotechnology;
 11. Social Sciences;
 12. Economic Sciences;
 13. Humanities.

The classification of a project proposal by domain, subdomain and research area is made according to *Appendix 1 – Scientific domains*;

² "Part-time" collaborations with institutions abroad or in the country are allowed.

- The project proposal is submitted by a research organisation (public law or private law), as host institution;
- The project proposal is developed by a researcher, called Project Director, in a research team;
- The Project Director has the main responsibility for implementing the scientific activities of the project, according to the project proposal accepted for funding;
- The Project Director is **employed full-time** in the host institution in Romania, for an indefinite period or for a fixed period covering at least the period of the Funding Contractual Agreement, or has the **employment agreement**, from the host institution, for at least the period of the Funding Contractual Agreement;
In the event of a decision to grant the funding, the full-time employment contract must be concluded by the Project Director with the host institution no later than the date of signing the Funding Contractual Agreement, with entry into force on the project start date;
- The Project Director carries out her/his activity with a physical presence in the host institution in Romania.

4. Duration

The project duration is min. 18 months – max. 24 months.

5. Budget

The funding granted for a project is maximum 600.000 lei for an implementation period of maximum 24 months. The requested budget for a project must reflect the real research costs, specific to the domain.

The maximum funding granted for a project with a duration shorter than 24 months is calculated proportionally to the project implementation period (number of months).

The budget allocated to this competition for the entire duration of the projects is maximum 52.000.000 lei, within the limits established by normative acts.

6. Eligibility criteria

- **Project host institution**
 - is a research and development institution or unit in Romania (research organization);
 - cannot be an enterprise, in the sense of state aid legislation;
 - has legal personality and operates in Romania;
 - is not declared, according to the law, to be in a state of payment default;
 - it does not have accounts blocked following a court order;
 - has fulfilled its obligations to pay taxes, fees and social security contributions to the component budgets of the general consolidated budget (state budget, special budgets, local budgets), in accordance with the legal provisions in force;
 - the legal representative has not been convicted in the last 3 years, by a final decision of a court, for an act that violated professional ethics or for committing a professional mistake;
 - it is not subject to an unexecuted recovery order following a previous decision of the European Commission, national courts or the competition authority declaring an aid illegal and incompatible with the internal market;
 - it has not made inaccurate declarations concerning the information required by UEFISCDI for the selection of contractors;

- it has not broken the terms of another Funding Contractual Agreement signed previously with a Contracting Authority;
- **Project Director:**
 - is a PhD with the first doctorate obtained no more than 12 years ago, compared to the moment of submitting the project proposal; The period of parental leave is excluded from the calculation of the 12-year period;
 - meets the minimal eligibility standards as defined in Appendix 2;
 - may submit only one project proposal within the competitions TE2026/PD2026/PCE2026. In case more project proposals are submitted (regardless of the type) by the same Project Director, all the project proposals will be declared ineligible;
 - has not benefited from another TE, PCE or PCCF research project financed from the National Research, Development and Innovation Plan, as Project Director.
- To avoid double funding, it is prohibited to submit projects that aim to carry out some activities already funded or in the process of being funded, partially or fully, from other budgetary sources;
- The Application Form complies with the technical drafting and formatting specifications established by this Information Package, including the appendices.

The project proposals that do not comply with all eligibility criteria will be declared ineligible

7. Ethics

The Project Director is obliged to ensure that the project proposal complies with the rules set out in Law no. 183/2024 on the status of research, development and innovation personnel, the standards of research integrity established in the European Code of Conduct for Research Integrity ALLEA³, as well as other ethical legislative regulations specific to the research domain of the project. Also, in the event that the project domain requires obtaining specific approvals and accreditations, the Project Director will ensure that they are obtained prior to the conclusion of the Funding Contractual Agreement or before the start of the targeted activity, as the case may be, according to the implementation plan.

It is recommended to pay attention to how digital responsibility⁴ is integrated into the way of development and implementation of the project. The use of external help, including some artificial intelligence systems, in the preparation of a proposal will not absolve the author from taking responsibilities regarding the respect of intellectual property, copyright, standards of academic integrity and the practice of good scientific and professional conduct.

8. Equal opportunities

Equal opportunities, as well as gender equality, will be ensured for all participants, both in the programme implementation and at the project level, in accordance with national legal provisions and European practices.

In developing and implementing the Application Form/project, the Project Directors must take all measures to promote equal gender opportunities between men and women. As far as possible, there

³ <https://allea.org/code-of-conduct/>

⁴ Digital responsibility refers to a set of practices and skills that help an organization use digital data and technologies in ways that are perceived to be socially, economically and environmentally responsible. The principles of digital responsibility can be found at https://uefiscdi.gov.ro/resource-867748-Responsabilitate-digital_Manifest_extras.pdf%20.

must be a balance between women and men for all positions provided in the Application Form/project.

If possible, mechanisms should be provided throughout the project implementation to attempt to recognize the types of gender biases, the times they occur and forms they take, and the ways to recognize and prevent them. In addition, attention should be paid to how the gender equality dimension is integrated into the research content and into all processes, mechanisms or resulting products provided in the Application Form.

9. Eligible expenses⁵

9.1 Direct expenses

Personnel expenses (young researchers, PhD students employed throughout the implementation of the research project according to the legislation in force); these expenses include legal contributions related to salaries and incomes assimilated to these⁶;

Logistics expenses necessary for implementing the project, including equipment, laboratory supplies, material expenses, expenses for dissemination, information and documentation, access to third-party research infrastructure, expenses for open access publication (open access) etc.;

Travel expenses corresponding to national or international travels of the research team members for documentation or research stages, participations in prestigious scientific events in the domain related to the project; travel expenses for national or from abroad collaborators as well as for participants to scientific events organised within the project may also be funded, with respect to the legal regulations;

9.2 Indirect expenses (overhead)

Indirect expenses (overhead) are calculated as a percentage of maximum 20% of direct expenses from which equipment expenses are deducted.

The overhead may be used also for the payment of administrative and auxiliary staff (technicians, master students, students, etc.) involved in project implementation.

Notes:

- The project proposal will specify the breakdown over the budget categories.
- Expenses for subcontracting some of the project activities are not eligible;
- For the implementation of the project, reallocations can be made between budget categories: personnel, logistics and travel expenses, in the limit of 20% of the total budget of each budget category, with notification at the reporting stage and in compliance with the provisions of the Funding Contractual Agreement concluded with the Contracting Authority (does not imply the conclusion of an Additional Act to the Funding Contractual Agreement). In the event that the necessary reallocations exceed the percentage of 20%, there must be a prior approval of the Contracting Authority (the Funding Contractual Agreement is amended by an Additional Act).
- Indirect expenses (overhead) cannot be increased.

10. The structure of the project team

The project team must consist of at least 3 persons, including the Project Director. The team members,

⁵ The categories of eligible expenses are stipulated in the GD 134/2011 approving the Methodological Norms concerning the categories of expenses for research - development and innovation activities, funded by the state budget;

⁶ Personnel expenses are subject to in force regulations regarding the maximum limits of the income earned by a person who participates in one or more projects, according to Appendix 2 to GD 1188/2022 approving PNCDI IV, with subsequent amendments and additions.

in addition to the Project Director, can be :

- researchers with their first PhD obtained no more than 12 years ago, compared to the moment of submitting the project proposal, nominated in the Funding Application;
- minimum 1 position of PhD student, in internship, with the agreement of the PhD supervisor (if the Project Director is not the PhD supervisor); her/his nomination is made upon submission or upon contracting.

Notes

- The research team structure is determined by the Project Director.
- When submitting the project proposal, the team structure must be presented, mentioning the exact number of full-time positions, their type, the link between the project activities and the allocated budget.
- The Project Director must provide working time norms, in fractions of full time, for the team members. All positions in the project team structure must be explicitly budgeted in the application form. The Project Director will specify the minimum number of hours/month that she/he will dedicate to the project.
- Nomination of the PhD students is possible, but not mandatory.
- If during the project implementation period, a PhD student position becomes vacant, it may be occupied by another PhD student.
- If the budget allocated for early-career researchers (PhD students, scientific research assistants with the status of PhD student) is not fully used, the unused difference is considered economy, without being able to be used for any other purpose.
- For the non-nominated positions in the Application Form the selection of the PhD students respectively the scientific research assistants with the status of PhD students will be carried out according to existing internal procedures.
- The change of the persons nominated in the Application Form is possible in compliance with the performance criteria and the attributions of the position specified in the Application Form.

11. Evaluation of the projects

11.1 Submission

Submission of the project proposals will be done in a single phase, using the online submission platform, <https://uefiscdi-direct.ro>. The submission of a project proposal is compulsory to be done from an account created by the Project Director (the identification data to create an account on the platform, have to be those pertaining to the Project Director).

The Application Form (according to Appendix 3) is written in English, except for the projects in Romanian-specific domains (according to Appendix 1), where writing in Romanian is allowed.

This is uploaded into the submission platform as an unprotected .pdf file (document generated from a text file in PDF).

11.2 Eligibility

The project proposals are administratively verified by UEFISCDI personnel to ensure compliance with eligibility criteria.

Verification of compliance with the minimum eligibility standards is carried out by the specialized committees of the CNCS.

The result is: ELIGIBLE/INELIGIBLE.

The list of eligible/ineligible project proposals is published on UEFISCDI's website <https://uefiscdi.gov.ro/>.

UEFISCDI may request clarifications regarding the documents uploaded to the platform (except for the Application Form), in compliance with the principle of equal treatment and non-discrimination. If the Project Director does not respond to the clarifications within the deadline provided in the request, the project proposal is declared ineligible.

Complaints can be uploaded to the projects submission platform, <https://uefiscdi-direct.ro>, from the Project Director's account, within 3 working days from the date of publication of the results. Confirmation of receipt of the complaint is sent to the Project Director by e-mail.

If, during or after the completion of the evaluation stage, a non-compliance with any of eligibility criteria is found, the project proposal will be declared ineligible and excluded from the competition.

11.3 Evaluation

The project proposals declared eligible are evaluated by experts from abroad, internationally recognized, with PhD, with at least 10 years of experience in scientific research activity.

At the same time, in the last 5 years, they have not had contractual relations with any institution involved in the project proposals allocated for evaluation. Each expert evaluator signs the *Declaration of Impartiality, Confidentiality and Competence*, appendix to the Contractual Agreement. The expert evaluator undertakes that at any time during the evaluation process, if she/he finds that one of the conditions provided in the *Declaration of Impartiality, Confidentiality and Competence* is not met, to notify UEFISCDI in writing. If UEFISCDI finds or is notified of the existence of a conflict of interest or a deviation, it will analyze the respective case and will take the necessary measures to replace the expert evaluator in question.

The evaluations are anonymous, ensuring the confidentiality of the expert evaluators.

The evaluation process will be assisted by scientific monitors (SM) nominated by the CNCS, avoiding conflicts of interest.

The role of the SM is to monitor the evaluation process, without intervening in the evaluation itself, signaling to the Rapporteurs any inconsistencies in the Consensus Report:

- lack of consistent comments (strengths and weaknesses) in relation to the scores granted, at the level of criteria/subcriteria;
- cases of use of some evaluation criteria different from those established by the Evaluation Sheet;
- any other inconsistencies with the provisions of the Information Package and the Evaluator's Guide.

The SM may bring to the attention of UEFISCDI any other issue arising in the evaluation process.

Individual evaluation

Each project proposal is evaluated, from the point of view of scientific quality, independently, online, by at least three expert evaluators from abroad, automatically and randomly assigned from the list of expert evaluators validated by CNCS and approved by State Authority for Research.

The expert evaluators fill in the Individual Evaluation Sheet, granting scores and identifying in the form of lists the strengths and weaknesses for each evaluation criterion/subcriterion, according to *Appendix 4*.

The evaluation of performance of the Project Director is done in accordance with the principles set out by CoARA⁷.

After finalizing all individual evaluations for a project, each expert evaluator will have access to the comments and scores of the other two expert evaluators. If necessary, each expert evaluator can adjust her/his comments and scores initially granted.

Elaboration of the Intermediary Evaluation Report

Each project proposal has a designated Rapporteur, the expert evaluator with the median score of the 3 evaluations. In the exceptional case where the designated Rapporteur cannot fulfill this role, the expert evaluator with the next score closest to the median score will be automatically designated.

The Rapporteur prepares the *Intermediary Evaluation Report*, according to **Appendix 4**, based on the individual evaluations and discussions with the other two expert evaluators, through the "forum"-type interface, available in the evaluation platform. She/he grants scores based on the individual scores given by the three expert evaluators.

The Intermediary Evaluation Report will be put to the vote of the other two expert evaluators. The expert evaluators will express their agreement or disagreement about the intermediary evaluation report on the platform (vote "agree" or "disagree") within 5 calendar days.

If the Intermediary Evaluation Report is validated unanimously ("agree" vote), it is considered that consensus has been reached for the respective project.

If consensus cannot be reached (one of the expert evaluators votes "disagree"), the evaluation process continues by appointing a fourth expert evaluator who completes the individual evaluation sheet.

Afterwards, the Rapporteur resumes drafting the Intermediary Evaluation Report, taking into account all individual evaluations. The Intermediary Evaluation Report is put to the vote of the expert evaluators, and its validation is based on the majority vote expressed.

If consensus is not reached after this stage either, the evaluation process for the respective project proposal is resumed.

The rebuttal

UEFISCDI makes available to the Project Directors, in the accounts from the online project proposals submission platform, <https://uefiscdi-direct.ro>, the Intermediary Evaluation Report (with scores), with the invitation to formulate a point of view regarding the comments of the expert evaluators.

The rebuttal, limited to 6.000 characters (including spaces), will be filled in using a form available in the online project proposals submission platform within 3 working days from the date of the initial response request.

The point of view of the Project Director will be written in the language used to write the project proposal and will consist strictly of a response to the critical observations, as they appear in the Intermediary Evaluation Report, without introducing additional elements to the submitted project proposal.

If the Project Director's rebuttal has elements that are not found in the project proposal, these will not be taken into consideration by the expert evaluators.

The rebuttal is not mandatory, and its absence will not affect the next steps in evaluation.

⁷ <https://www.coara.org/agreement/the-agreement-full-text/>

Drafting of the Consensus Report

The expert evaluators and the Rapporteur will automatically receive notification regarding the existence on the online platform of the rebuttal from the Project Director. Through the forum-type interface, the expert evaluators and the Rapporteur will discuss the Project Director's rebuttal.

Following these discussions, the Rapporteur may modify the Intermediary Evaluation Report, drafting the *Consensus Report*.

The Consensus Report will be put to the vote of the expert evaluators. The expert evaluators will express, on the platform, the agreement or disagreement for the Consensus Report („agree” or „disagree” vote).

If the Consensus Report is unanimously validated ("agree" vote) , it is considered that consensus has been reached for the respective project.

If the consensus is not reached (there is a “disagree” vote), an online meeting between the Rapporteur and the expert evaluators and the Rapporteur is organized for discussions and a final decision.

If following this discussion the consensus is not reached, the project will be analyzed within the panel meeting, for the final decision.

The Scientific Monitor will verify the Consensus Report and will formulate, in the section specially created in the evaluation platform, a point of view regarding the compliance with the provisions of the Information Package and the Evaluator's Guide. The observations of the SM will be discussed in the case of those projects that enter the Panel.

Panel evaluation

For each of the 13 domains of the competition, a panel is established consisting of Rapporteurs and expert evaluators involved in the evaluation of the project proposals, especially those who have been assigned to projects to be analyzed in the panel.

During the panel meeting, are analyzed the project proposals for which the consensus was not reached, and those that obtained scores higher than or equal to 80 points after completing the consensus stage.

In preparation for the panel meeting, each panel member will have access to: the project proposals to be discussed, all the Individual Evaluation Sheets, the Intermediary Evaluation Reports, the rebuttals (if any), the Consensus Reports and the observations of the scientific monitor (SM), if any.

For each project proposal, along with the Rapporteur assigned to the project, another member of the panel will be designated also, who will be tasked with carefully reading all the information related to the project and intervening during the discussions regarding the respective project.

The Rapporteur or the designated member of the panel for the project in question (if the Rapporteur cannot be present) presents the results of the evaluation process.

The panel will analyze the projects and determine the final score, by majority vote, for each project discussed. The Final Evaluation Report is prepared by one of the panel members. If the panel agrees with the Consensus Report, it becomes the Final Evaluation Report.

The panel meetings are coordinated by a Chair, a member of the CNCS or of the CNCS specialized committees, whose areas of expertise are different from the panel's domain. She/He will moderate the panel debates without intervening in the decision-making.

12. Publication of the preliminary results

The list of project proposals in descending order of score obtained, at the level of each domain, will be published on UEFISCDI's website.

The Project Directors are informed of the presence of the *Final Evaluation Report* in the accounts from the submission platform, <https://uefiscdi-direct.ro>, by sending a notification by email to the address specified in the project proposal.

13. Complaints

Complaints will be uploaded into the projects submission platform, <https://uefiscdi-direct.ro>, from the Project Director's account, within 3 working days from the date of publishing the preliminary results.

Confirmation of receipt of the complaint is sent by e-mail to the Project Director.

Complaints are written in the language used for elaborating the project and can be exclusively about procedural flaws which the Project Director considers inconsistent with the specifications from the Information Package.

Complaints may not concern the scores and comments of the expert evaluators except in cases where the comments clearly contradict the Application Form and thus indicate a possible procedural flaw.

14. Competition results

- The list of project proposals, at the level of each domain, in order of the score obtained after solving the complaints, is published on UEFISCDI's website;
- A project proposal can be recommended for funding if the final score obtained is of min. 80 points;
- The projects are ranked based on the final scores, for each of the 13 domains, and proposed for funding within the allocated budget.
- If there are two or more project proposals with identical final score, their tie will be made according to the total score obtained for criterion 1. In case there are two or more project proposals with identical final scores also on criterion 1, the tie will be determined based on the scores obtained on the criteria and subcriteria, in the order 2.1, 2.2, 2.3. If the competition's budget does not allow for funding all projects with the same final score and they cannot be tied, then all the projects in question will be included in the competition's Reserve List.
- In the situation that savings are registered at the competition level, projects from the Reserve List, established at the competition level, by domains, in descending order of the final score, will be funded;
- The list of project proposals recommended for funding, as well as the List of reserve projects, approved by CNCS, are submitted to the State Authority for Research for approval. The lists will be published at the web address <https://uefiscdi.gov.ro/>.
- After the completion of the competition, UEFISCDI will publish on the website <https://uefiscdi.gov.ro> the *List of expert evaluators* used in the evaluation process.

15. Budget negotiation and signing of the Funding Contractual Agreements

For the project proposals accepted for funding, a Funding Contractual Agreement is concluded between two parties: the Contracting Authority - UEFISCDI and the Contractor - the project host institution.

The Project Directors of the projects accepted for funding will negotiate with UEFISCDI the amount and structure of the requested budget. The basis for the discussion is represented by the observations from the Final Evaluation Report regarding the degree of correlation between the intended objectives and the requested budget.

The negotiated budget cannot exceed the amount of the budget originally requested through the Application Form. The Funding Contractual Agreement is signed after the negotiation process.

In the situation where there are funds available as a result of non-contracting or reduction of the proposed budget for the projects accepted for funding or as a result of supplementing the budget originally allocated to the competition, the negotiation and contracting of the projects included in the Reserve List will be initiated, in the order of the score obtained, up to the concurrent coverage of the approved amount.

16. Main obligations of the parties

Host Institution/Project Director

- Are responsible for the project implementation, with respect of deadlines and allocated budgets;
- Elaborate and send to the Contracting Authority scientific progress reports throughout the project and a final report, at the time and in the format specified by UEFISCDI in the Funding Contractual Agreement. Deadlines of intermediary reports are proposed by the Project Director, in accordance with the work plan set out in the Application Form.
- Promote the activities and publish the vacant positions in the research project (including on <https://jobs.mcid.gov.ro/> and <https://www.euraxess.gov.ro/> sites);
- Ensure that the staff involved in the project has created and updated the scientific profile on the IT platform <https://brainmap.ro/>;
- Provide updated information on the project implementation (at least the abstract of the project, the team members and the results obtained in the project) on a webpage, in English;
- The host institution ensures the access of the project team to the existing research infrastructure and administratively supports it in the implementation of the project;
- The host institution, on the date of signing the Funding Contractual Agreement, presents the adopted Gender Equality Plan (GEP) (link).

UEFISCDI:

- Ensures the funding and the monitoring of the project, according to the Funding Contractual Agreement provisions with respect to the law;
- Processes personal data in accordance with the provisions of Regulation (EU) 2016/679 (RGPD 2018) and Law 190/2018 on the protection of individuals with regard to the processing of personal data and on the free movement of such data, <https://uefiscdi.ro/protectia-datelor-cu-caracter-personal>.

17. Portability of the research project

Usually, the Project Director will implement the project in the host institution mentioned in the Application Form. However, UEFISCDI, as Contracting Authority, may allow the Project Director to submit a single request for the transfer of the project to another host institution in the country, and only during the first 12 months of the project implementation period. The purpose of providing this freedom of choice to the Project Director is to optimize the chances of success of the project.

The Project Director has the obligation to address, in writing, to UEFISCDI the request to transfer the project to another host institution, accompanied by a well-founded justification and the acceptance of the new host institution and the initial host institution. If the initial host institution refuses the transfer, it must send UEFISCDI the motivation for the refusal in writing. CNCS and UEFISCDI will analyze the transfer request initiated by the Project Director and, if applicable, the refusal letter from the initial host institution and will take a decision in order to increase the chances of successful implementation of the project.

If the transfer request is accepted, UEFISCDI will terminate the contract with the initial host institution and will sign a Funding Contractual Agreement with the new host institution.

The initial host institution is obliged to transfer, within a maximum period of 30 days, both the funds, as well as the equipment and goods purchased from the project funds, to the new host institution, in order to allow the resumption of the research activities provided in the project without delay. The transportation expenses related to the transfer of the equipment and goods purchased through the project, from the initial host institution to the new host institution, are financed by the new host institution.

18. Monitoring of the projects

The monitoring of the projects activity will be carried out from a technical, scientific and financial point of view, based on reports (intermediary, annual and final) written in the language of the project proposal and carried out by the contractors. In the monitoring activity will be involved, to the extent possible, the initial expert evaluators of the project proposal. Also, 12 months after the end of the project, an assessment of the final results obtained, updated, may be carried out.

19. Failure in research

The failure in research corresponds to the situations in which, following the proper development of the activities provided in a research project, with the achievement of the deliverables assumed according to the Funding Contractual Agreement, the results obtained are not in accordance with the preliminary ones (working hypotheses mentioned in the project proposal are not confirmed, the preliminary functionality in the project proposal is not validated).

For an ongoing project, the failure in research can be identified by the evaluation and monitoring commissions, set up for this purpose by the Contracting Authority (according to the provisions of art. 87 of GO 57/2002, with subsequent amendments and additions and sections 11 and 13, letter r, of GD 1188/2022 regarding the approval of the National Plan for Research, Development and Innovation 2022-2027).

During the evaluation and monitoring, the commissions will determine whether:

- The project research team complied with the Funding Contractual Agreement, carrying out the planned activities in good faith, even if the results are not the preliminary ones (expected). This case falls under the risk of research;
- The project research team has inadequately carried out the activities provided in the Funding Contractual Agreement or has not carried them out, without notifying the Contracting Authority of the reasons that led to this situation. In these circumstances, the failures are attributable to the Contractor and the Contracting Authority may request the return of the funds used improperly.
- The process of identifying and certifying situations that fall under the risk of research involves examining:

- How were carried out the activities within the project, in accordance with the Application Form, appendix to the Funding Contractual Agreement (observance of the content and the timeline);
- How have been obtained the results (theoretical or experimental), including the achievement of deliverables associated with the objectives/activities, even if they differ from the preliminary ones in the Application Form;
- How was carried out the communication with the Contracting Authority regarding the discrepancies between the results obtained during the implementation of the project and those initially provided in the Application Form.

Based on the reports of the evaluation and monitoring commissions, the Contracting Authority accepts the failure in the research, without the obligation to recover the funds spent from the state budget.

If the evaluation and monitoring commissions find that, through the Contractor's own fault, the stages/activities and objectives provided in the implementation plan for which funding was received have not been achieved, the project will be interrupted and the funding quota allocated from the programme budget will be returned to the Contracting Authority.

20. Competition timeline

Competition launch	4 th of June 2026
Submitting the Application Forms	30 th of July 2026, 4.00 p.m.
Eligibility results	15 th September 2026
Evaluation process	16 th September 2026 - 16 th February 2027
Final results	15 th March 2027

21. Appendixes and Affidavits⁸

- Appendix 1** - Scientific Domains
- Appendix 2** - Minimal eligibility standards for the Project Director
- Appendix 3** - Application Form
- Appendix 3.1** - CV Template and track record
- Appendix 4** - Individual Evaluation Sheet/Intermediary Evaluation Report/Consensus Report/Final Evaluation Report
- Appendix 5.1** - Affidavit about complying with the definition of the research organization;
- Appendix 5.2** - Affidavit regarding the eligibility of the research organisation
- Appendix 5.3** - Affidavit regarding non-financing from other sources, certification of the legality and correctness of the information contained in the Application Form and the information filled in on the submission platform;

⁸ The affidavits will be filled in, signed and uploaded to the submission platform, scanned in .pdf format.

- Appendix 5.4** - Affidavit on own responsibility of the host institution for certifying the acceptance of the project implementation in the institution;
- Appendix 5.5** - Affidavit of the Project Director certifying compliance with the eligibility criteria regarding participation in TE2026 proposals;
- Appendix 5.6** - Affidavit of consent regarding the processing of personal data
- Appendix 5.7** - Affidavit on the use of artificial intelligence in the development of the project proposal
- Appendix 5.8** - The agreement of the PhD supervisor, if she/he is not member in the project team
- Appendix 6** - Definitions
- Appendix 7a** - CNCS Classification of Scientific Journals in the Humanities
- Appendix 7b** - CNCS Classification of Scientific Publishing Houses in the Humanities
- Appendix 7c** - List of publishing houses considered for books and collective volumes in the domain of social sciences

Appendix 1 – Scientific domains

Physical Sciences and Engineering

PE1 Mathematics

All areas of mathematics, pure and applied, plus mathematical foundations of computer science, mathematical physics and statistics

PE1_1 Logic and foundations

PE1_2 Algebra

PE1_3 Number theory

PE1_4 Algebraic and complex geometry

PE1_5 Lie groups, Lie algebras

PE1_6 Geometry and global analysis

PE1_7 Topology

PE1_8 Analysis

PE1_9 Operator algebras and functional analysis

PE1_10 ODE and dynamical systems

PE1_11 Theoretical aspects of partial differential equations

PE1_12 Mathematical physics

PE1_13 Probability

PE1_14 Mathematical statistics

PE1_15 Generic statistical methodology and modelling

PE1_16 Discrete mathematics and combinatorics

PE1_17 Mathematical aspects of computer science

PE1_18 Numerical analysis

PE1_19 Scientific computing and data processing

PE1_20 Control theory, optimisation and operational research

PE1_21 Application of mathematics in sciences

PE1_22 Application of mathematics in industry and society

PE2 Fundamental Constituents of Matter

Particle, nuclear, plasma, atomic, molecular, gas, and optical physics

PE2_1 Theory of fundamental interactions

PE2_2 Phenomenology of fundamental interactions

PE2_3 Experimental particle physics with accelerators

PE2_4 Experimental particle physics without accelerators

PE2_5 Classical and quantum physics of gravitational interactions

PE2_6 Nuclear, hadron and heavy ion physics

PE2_7 Nuclear and particle astrophysics

PE2_8 Gas and plasma physics

PE2_9 Electromagnetism

PE2_10 Atomic, molecular physics

PE2_11 Ultra-cold atoms and molecules

PE2_12 Optics, non-linear optics and nano-optics

PE2_13 Quantum optics and quantum information

PE2_14 Lasers, ultra-short lasers and laser physics

- PE2_15 Thermodynamics
- PE2_16 Non-linear physics
- PE2_17 Metrology and measurement
- PE2_18 Equilibrium and non-equilibrium statistical mechanics: steady states and dynamics

PE3 Condensed Matter Physics

Structure, electronic properties, fluids, nanosciences, biological physics

- PE3_1 Structure of solids, material growth and characterisation
- PE3_2 Mechanical and acoustical properties of condensed matter, lattice dynamics
- PE3_3 Transport properties of condensed matter
- PE3_4 Electronic properties of materials, surfaces, interfaces, nanostructures
- PE3_5 Physical properties of semiconductors and insulators
- PE3_6 Macroscopic quantum phenomena, e.g. superconductivity, superfluidity, quantum Hall effect
- PE3_7 Spintronics
- PE3_8 Magnetism and strongly correlated systems
- PE3_9 Condensed matter – beam interactions (photons, electrons etc.)
- PE3_10 Nanophysics, e.g. nanoelectronics, nanophotonics, nanomagnetism, nanoelectromechanics
- PE3_11 Mesoscopic quantum physics and solid-state quantum technologies
- PE3_12 Molecular electronics
- PE3_13 Structure and dynamics of disordered systems, e.g. soft matter (gels, colloids, liquid crystals), granular matter, liquids, glasses, defects
- PE3_14 Fluid dynamics (physics)
- PE3_15 Statistical physics: phase transitions, condensed matter systems, models of complex systems, interdisciplinary applications
- PE3_16 Physics of biological systems

PE4 Physical and Analytical Chemical Sciences

Analytical chemistry, chemical theory, physical chemistry/chemical physics

- PE4_1 Physical chemistry
- PE4_2 Spectroscopic and spectrometric techniques
- PE4_3 Molecular architecture and Structure
- PE4_4 Surface science and nanostructures
- PE4_5 Analytical chemistry
- PE4_6 Chemical physics
- PE4_7 Chemical instrumentation
- PE4_8 Electrochemistry, electrodialysis, microfluidics, sensors
- PE4_9 Method development in chemistry
- PE4_10 Heterogeneous catalysis
- PE4_11 Physical chemistry of biological systems
- PE4_12 Chemical reactions: mechanisms, dynamics, kinetics and catalytic reactions
- PE4_13 Theoretical and computational chemistry
- PE4_14 Radiation and Nuclear chemistry
- PE4_15 Photochemistry
- PE4_16 Corrosion
- PE4_17 Characterisation methods of materials

PE4_18 Environment chemistry

PE5 Synthetic Chemistry and Materials

New materials and new synthetic approaches, structure-properties relations, solid state chemistry, molecular architecture, organic chemistry

PE5_1 Structural properties of materials

PE5_2 Solid state materials chemistry

PE5_3 Surface modification

PE5_4 Thin films

PE5_5 Ionic liquids

PE5_6 New materials: oxides, alloys, composite, organic-inorganic hybrid, nanoparticles

PE5_7 Biomaterials synthesis

PE5_8 Intelligent materials synthesis – self assembled materials

PE5_9 Coordination chemistry

PE5_10 Colloid chemistry

PE5_11 Biological chemistry and chemical biology

PE5_12 Chemistry of condensed matter

PE5_13 Homogeneous catalysis

PE5_14 Macromolecular chemistry

PE5_15 Polymer chemistry

PE5_16 Supramolecular chemistry

PE5_17 Organic chemistry

PE5_18 Medicinal chemistry

PE6 Computer Science and Informatics

Theoretical and experimental computer science, information processing, intelligent systems

PE6_1 Computer architecture, high-performance computing, real-time and embedded systems

PE6_2 Operating and distributed systems, computer networks and performance evaluation, mobile computing

PE6_3 Software engineering, programming languages

PE6_4 Theory of computation, semantics of computation, formal methods

PE6_5 Algorithms, complexity theory, algorithmic game theory and computational economics

PE6_6 Security, privacy, cryptology

PE6_7 Databases, web and information systems, information retrieval

PE6_8 Artificial intelligence, autonomous agents, knowledge representation

PE6_9 Machine learning, statistical data processing, computing with artificial neural networks

PE6_10 Natural language processing, large language and other foundation models

PE6_11 Computer vision, computer graphics, visualization

PE6_12 Human computer interaction, multimedia and virtual reality, computer games

PE6_13 Numerical and scientific computing, computational modelling and simulation methods, bioinformatics

PE6_14 New computational paradigms, quantum computing, bio-inspired computing

PE7 Systems and Communication Engineering

Electrical, electronic, communication, optical and systems engineering

PE7_1 Control engineering
PE7_2 Electrical engineering: power components and/or systems
PE7_3 Simulation engineering and modelling
PE7_4 (Micro- and nano-) systems engineering
PE7_5 (Micro- and nano-) electronic, optoelectronic and photonic components
PE7_6 Communication systems, wireless technology, high-frequency technology
PE7_7 Signal processing
PE7_8 Networks, e.g. communication networks and nodes, Internet of Things, sensor networks, networks of robots
PE7_9 Man-machine interfaces
PE7_10 Robotics
PE7_11 Components and systems for applications (in e.g. medicine, biology, environment)
PE7_12 Electrical energy production, distribution, applications

PE8 Products and Processes Engineering

Product and process design, chemical, civil, environmental, mechanical, vehicle engineering, energy processes and relevant computational methods

PE8_1 Aerospace engineering
PE8_2 Chemical engineering, technical chemistry
PE8_3 Civil engineering, architecture, offshore construction, lightweight construction, geotechnics
PE8_4 Computational engineering
PE8_5 Fluid mechanics
PE8_6 Energy processes engineering
PE8_7 Mechanical engineering
PE8_8 Propulsion engineering, e.g. hydraulic, turbo, piston, hybrid engines
PE8_9 Production technology, process engineering
PE8_10 Manufacturing engineering and industrial design
PE8_11 Environmental engineering, e.g. sustainable design, waste and water treatment, recycling, regeneration or recovery of compounds, carbon capture & storage
PE8_12 Naval/marine engineering
PE8_13 Automotive and rail engineering; multi-/inter-modal transport engineering

PE9 Universe Sciences

Astro-physics/-chemistry/-biology; solar system; planetary systems; stellar, galactic and extragalactic astronomy; cosmology; space sciences; astronomical instrumentation and data

PE9_1 Solar physics – the Sun and the heliosphere
PE9_2 Solar system science
PE9_3 Exoplanetary science, formation and characterization of extrasolar planets
PE9_4 Astrobiology
PE9_5 Interstellar medium and star formation
PE9_6 Stars – stellar physics, stellar systems
PE9_7 The Milky Way
PE9_8 Galaxies – formation, evolution, clusters
PE9_9 Cosmology and large-scale structure, dark matter, dark energy
PE9_10 Relativistic astrophysics and compact objects

PE9_11 Gravitational wave astronomy

PE9_12 High-energy and particle astronomy

PE9_13 Astronomical instrumentation and data, telescopes, detectors, techniques, archives, analyses

PE10 Earth System Science

Physical geography, geology, geophysics, atmospheric sciences, oceanography, climatology, cryology, ecology, global environmental change, biogeochemical cycles, natural resources management

PE10_1 Atmospheric chemistry, atmospheric composition, air pollution

PE10_2 Meteorology, atmospheric physics and dynamics

PE10_3 Climatology and climate change

PE10_4 Terrestrial ecology, land cover change

PE10_5 Geology, tectonics, volcanology

PE10_6 Palaeoclimatology, palaeoecology

PE10_7 Physics of earth's interior, seismology, geodynamics

PE10_8 Oceanography (physical, chemical, biological, geological)

PE10_9 Biogeochemistry, biogeochemical cycles, environmental chemistry

PE10_10 Mineralogy, petrology, igneous petrology, metamorphic petrology

PE10_11 Geochemistry, cosmochemistry, crystal chemistry, isotope geochemistry, thermodynamics

PE10_12 Sedimentology, soil science, palaeontology, earth evolution

PE10_13 Physical geography, geomorphology

PE10_14 Earth observations from space/remote sensing

PE10_15 Geomagnetism, palaeomagnetism

PE10_16 Ozone, upper atmosphere, ionosphere

PE10_17 Hydrology, hydrogeology, engineering and environmental geology, water and soil pollution

PE10_18 Cryosphere, dynamics of snow and ice cover, sea ice, permafrosts and ice sheets

PE10_19 Planetary geology and geophysics

PE10_20 Geohazards

PE10_21 Earth system modelling and interactions

PE11 Materials Engineering

Advanced materials development: performance enhancement, modelling, large-scale preparation, modification, tailoring, optimisation, novel and combined use of materials etc.

PE11_1 Engineering of biomaterials, biomimetic, bioinspired and bio-enabled materials

PE11_2 Engineering of metals and alloys

PE11_3 Engineering of ceramics and glasses

PE11_4 Engineering of polymers and plastics

PE11_5 Engineering of composites and hybrid materials

PE11_6 Engineering of carbon materials

PE11_7 Engineering of metal oxides

PE11_8 Engineering of alternative established or emergent materials

PE11_9 Nanomaterials engineering, e.g. nanoparticles, nanoporous materials, 1D&2D nanomaterials

PE11_10 Soft materials engineering, e.g. gels, foams, colloids

PE11_11 Porous materials engineering, e.g. covalent-organic, metal-organic, porous aromatic frameworks

PE11_12 Semi-conducting and magnetic materials engineering
PE11_13 Metamaterials engineering
PE11_14 Computational methods for materials engineering

Life Sciences

LS1 Molecules of Life: Biological Mechanisms, Structures and Functions

For all organisms: Molecular biology, biochemistry, structural biology, molecular biophysics, synthetic and chemical biology, drug design, innovative methods and modelling

LS1_1 Macromolecular complexes including interactions involving nucleic acids, proteins, lipids and carbohydrates

LS1_2 Biochemistry

LS1_3 DNA and RNA biology

LS1_4 Protein biology

LS1_5 Lipid biology

LS1_6 Glycobiology

LS1_7 Molecular biophysics, biomechanics, bioenergetics

LS1_8 Structural biology

LS1_9 Molecular mechanisms of signalling processes

LS1_10 Synthetic biology

LS1_11 Chemical biology

LS1_12 Protein design

LS1_13 Early translational research and drug design

LS1_14 Innovative methods and modelling in molecular, structural and synthetic biology

LS2 Integrative Biology: from Genes and Genomes to Systems

For all organisms: Genetics, epigenetics, genomics and other 'omics studies, bioinformatics, systems biology, genetic diseases, gene editing, innovative methods and modelling, 'omics for personalised medicine

LS2_1 Genetics

LS2_2 Gene editing

LS2_3 Epigenetics

LS2_4 Gene regulation

LS2_5 Genomics

LS2_6 Metagenomics

LS2_7 Transcriptomics

LS2_8 Proteomics

LS2_9 Metabolomics

LS2_10 Glycomics/Lipidomics

LS2_11 Bioinformatics and computational biology

LS2_12 Biostatistics

LS2_13 Systems biology

LS2_14 Genetic diseases

LS2_15 Integrative biology for personalised medicine

LS2_16 Innovative methods and modelling in integrative biology

LS3 Cell Biology, Development, Stem Cells and Regeneration

For all organisms: Structure and function of the cell, cell-cell communication, embryogenesis, tissue differentiation, organogenesis, growth, development, evolution of development, organoids, stem cells, regeneration, therapeutic approaches

LS3_1 Cell cycle, cell division and growth

LS3_2 Cell senescence, cell death, autophagy, cell ageing

LS3_3 Cell behaviour, including control of cell shape, cell migration

LS3_4 Cell junctions, cell adhesion, the extracellular matrix, cell communication

LS3_5 Cell signalling and signal transduction, exosome biology

LS3_6 Organelle biology and trafficking

LS3_7 Mechanobiology of cells, tissues and organs

LS3_8 Embryogenesis, pattern formation, morphogenesis

LS3_9 Cell differentiation, formation of tissues and organs

LS3_10 Developmental genetics

LS3_11 Evolution of developmental strategies

LS3_12 Organoids

LS3_13 Stem cells

LS3_14 Regeneration

LS3_15 Development of cell-based therapeutic approaches for tissue regeneration

LS3_16 Functional imaging of cells and tissues

LS3_17 Theoretical modelling in cellular, developmental and regenerative biology

LS4 Physiology in Health, Disease and Ageing

Organ and tissue physiology, comparative physiology, physiology of ageing, pathophysiology, inter-organ and tissue communication, endocrinology, nutrition, metabolism, interaction with the microbiome, non-communicable diseases including cancer (and except disorders of the nervous system and immunity-related diseases)

LS4_1 Organ and tissue physiology and pathophysiology

LS4_2 Comparative physiology

LS4_3 Physiology of ageing

LS4_4 Endocrinology

LS4_5 Non-hormonal mechanisms of inter-organ and tissue communication

LS4_6 Microbiome and host physiology

LS4_7 Nutrition and exercise physiology

LS4_8 Impact of stress (including environmental stress) on physiology

LS4_9 Metabolism and metabolic disorders, including diabetes and obesity

LS4_10 The cardiovascular system and cardiovascular diseases

LS4_11 Haematopoiesis and blood diseases

LS4_12 Cancer

LS4_13 Other non-communicable diseases (except disorders of the nervous system and immunity-related diseases)

LS5 Neuroscience and Disorders of the Nervous System

Nervous system development, homeostasis and ageing, nervous system function and dysfunction,

systems neuroscience and modelling, biological basis of cognitive processes and of behaviour, neurological and mental disorders – In humans and all other organisms

LS5_1 Neuronal cells

LS5_2 Glial cells and neuronal-glia communication

LS5_3 Neural development and related disorders

LS5_4 Neural stem cells

LS5_5 Neural networks and plasticity

LS5_6 Neurovascular biology and blood-brain barrier

LS5_7 Sensory systems, sensation and perception, including pain

LS5_8 Neural basis of behaviour (e.g. sleep, consciousness, addiction)

LS5_9 Neural basis of cognition (e.g. learning, memory, attention, emotions, speech)

LS5_10 Ageing of the nervous system

LS5_11 Neurological and neurodegenerative disorders

LS5_12 Mental disorders

LS5_13 Nervous system injuries and trauma, stroke

LS5_14 Repair and regeneration of the nervous system

LS5_15 Neuroimmunology, neuroinflammation

LS5_16 Systems and computational neuroscience (e.g. modelling, simulation, brain oscillations, connectomics)

LS5_17 Imaging in neuroscience

LS5_18 Innovative methods and tools for neuroscience

LS6 Immunity, Infection and Immunotherapy

The immune system, related disorders and their mechanisms, biology of infectious agents and infection, biological basis of prevention and treatment of infectious diseases, innovative immunological tools and approaches, including therapies

LS6_1 Innate immunity

LS6_2 Adaptive immunity

LS6_3 Regulation of the immune response

LS6_4 Immune-related diseases

LS6_5 Biology of pathogens (e.g. bacteria, viruses, parasites, fungi)

LS6_6 Infectious diseases

LS6_7 Mechanisms of infection

LS6_8 Biological basis of prevention and treatment of infection

LS6_9 Antimicrobials, antimicrobial resistance

LS6_10 Vaccine development

LS6_11 Innovative immunological tools and approaches, including therapies

LS7 Prevention, Diagnosis and Treatment of Human Diseases

Medical technologies and tools for prevention, diagnosis and treatment of human diseases, therapeutic approaches and interventions, pharmacology, preventative medicine, epidemiology and public health, digital medicine

LS7_1 Medical imaging for prevention, diagnosis and monitoring of diseases

LS7_2 Medical technologies and tools (including genetic tools and biomarkers) for prevention, diagnosis, monitoring and treatment of diseases

LS7_3 Nanomedicine
LS7_4 Regenerative medicine
LS7_5 Applied gene, cell and immune therapies
LS7_6 Other medical therapeutic interventions, including transplantation
LS7_7 Pharmacology and toxicology
LS7_8 Effectiveness of interventions, including resistance to therapies
LS7_9 Public health and epidemiology
LS7_10 Preventative and prognostic medicine
LS7_11 Environmental health, occupational medicine
LS7_12 Health care, including care for the ageing population
LS7_13 Palliative medicine
LS7_14 Digital medicine, e-medicine, medical applications of artificial intelligence
LS7_15 Medical ethics

LS8 Environmental Biology, Ecology and Evolution

For all organisms: Ecology, biodiversity, environmental change, evolutionary biology, behavioural ecology, microbial ecology, marine biology, ecophysiology, theoretical developments and modelling

LS8_1 Ecosystem and community ecology, macroecology
LS8_2 Biodiversity
LS8_3 Conservation biology
LS8_4 Population biology, population dynamics, population genetics
LS8_5 Biological aspects of environmental change, including climate change
LS8_6 Evolutionary ecology
LS8_7 Evolutionary genetics
LS8_8 Phylogenetics, systematics, comparative biology
LS8_9 Macroevolution and paleobiology
LS8_10 Ecology and evolution of species interactions
LS8_11 Behavioural ecology and evolution
LS8_12 Microbial ecology and evolution
LS8_13 Marine biology and ecology
LS8_14 Ecophysiology, from organisms to ecosystems
LS8_15 Theoretical developments and modelling in environmental biology, ecology, and evolution

LS9 Biotechnology and Biosystems Engineering

Biotechnology using all organisms, biotechnology for environment and food applications, applied plant and animal sciences, bioengineering and synthetic biology, biomass and biofuels, biohazards

LS9_1 Bioengineering for synthetic and chemical biology
LS9_2 Applied genetics, gene editing and transgenic organisms
LS9_3 Bioengineering of cells, tissues, organs and organisms
LS9_4 Microbial biotechnology and bioengineering
LS9_5 Food biotechnology and bioengineering
LS9_6 Marine biotechnology and bioengineering
LS9_7 Environmental biotechnology and bioengineering
LS9_8 Applied plant sciences, plant breeding, agroecology and soil biology
LS9_9 Plant pathology and pest resistance

LS9_10 Veterinary and applied animal sciences
LS9_11 Biomass production and utilisation, biofuels
LS9_12 Ecotoxicology, biohazards and biosafety

Social Sciences and Humanities

SH1 Individuals, Markets and Organisations

Economics, finance, management

SH1_1 Macroeconomics; monetary economics; economic growth, labour economics

SH1_2 International trade; international business; spatial economics

SH1_3 Development economics political economics

SH1_4 Finance; financial markets

SH1_5 Corporate finance; international finance

SH1_6 Banking, insurance

SH1_7 Accounting, asset prices, auditing

SH1_8 Econometrics, game theory, decision theory

SH1_9 Behavioural economics; experimental economics; neuro-economics

SH1_10 Microeconomics, industrial organisation, applied microeconomics

SH1_11 Innovation, research & development, entrepreneurship

SH1_12 Management; operations management, international management

SH1_13 Human resource management; organisational behaviour

SH1_14 Strategy, operation research

SH1_15 Marketing, consumer behaviour

SH1_16 Quantitative economic history, economic systems, institutional economics

SH2 Institutions, Governance and Legal Systems

Political science, international relations, law

SH2_1 Political systems, governance

SH2_2 Democratisation and social movements

SH2_3 Conflict resolution, war, peace building

SH2_4 Legal studies, comparative law, law and economics

SH2_5 Constitutions, human rights, international law

SH2_6 International relations, global and transnational governance

SH2_7 Humanitarian assistance and development

SH2_8 Political and legal philosophy

SH2_9 Digital approaches to political science and law

SH3 The Social World and Its Interactions

Sociology, social psychology, education sciences, communication studies

SH3_1 Social structure, social mobility, social innovation

SH3_2 Inequalities, discrimination, prejudice

SH3_3 Aggression and violence, antisocial behaviour, crime

SH3_4 Social integration, exclusion, prosocial behaviour

SH3_5 Social attitudes and beliefs

SH3_6 Social influence; power and group behaviour

SH3_7 Social policies, welfare, work and employment

SH3_8 Poverty and poverty alleviation

SH3_9 Social aspects of teaching and learning, curriculum studies, education and educational policies

SH3_10 Communication and information, networks, media

SH3_11 Digital social research

SH3_12 Social studies of science and technology

SH4 The Human Mind and Its Complexity

Cognitive science, psychology, linguistics

SH4_1 Cognitive basis of human development, developmental disorders; comparative cognition

SH4_2 Personality and social cognition; emotion

SH4_3 Clinical and health psychology

SH4_4 Neurocognitive psychology

SH4_5 Attention, perception, action, consciousness

SH4_6 Learning, memory; cognition in ageing

SH4_7 Reasoning, decision-making; intelligence

SH4_8 Language learning and processing (first and second languages)

SH4_9 Theoretical linguistics; computational linguistics

SH4_10 Language typology; historical linguistics

SH4_11 Pragmatics, sociolinguistics, linguistic anthropology, discourse analysis

SH5 Texts and Concepts

Literary studies, literature, philosophy

SH5_1 Classics, ancient literature

SH5_2 Theory and history of literature, comparative literature

SH5_3 Book studies

SH5_4 Philology; text and image studies

SH5_5 Palaeography and codicology

SH5_6 Philosophy of mind, philosophy of language

SH5_7 Philosophy of science, epistemology, logic

SH5_8 Metaphysics, philosophical anthropology; aesthetics

SH5_9 Ethics and its applications; social philosophy

SH5_10 History of philosophy

SH5_11 Digital humanities; digital approaches to literary studies and philosophy

SH6 The Study of the Human Past

Archaeology and history

SH6_1 Archaeological methods and theory, history of archaeology

SH6_2 Prehistoric archaeology, archaeology of non-literate societies

SH6_3 Archaeology of early literate societies and early civilizations

SH6_4 Medieval and post-medieval archaeologies

SH6_5 Archaeological science, bioarchaeology, environmental archaeology, geoarchaeology

SH6_6 Digital, computational, virtual and geospatial archaeologies

SH6_7 Historiography, theory and methods of history, including the analysis of digital data

SH6_8 Ancient history, medieval history

SH6_9 Early modern, modern, and contemporary history

SH6_10 Colonial and post-colonial history

- SH6_11 Global, transnational, and comparative history
- SH6_12 Social and economic history
- SH6_13 Cultural history, intellectual history
- SH6_14 History of science and technologies, environmental history

SH7 Human Mobility, Environment, and Space

Human geography, demography, health, sustainability science, territorial planning, spatial analysis

- SH7_1 Human, economic and social geography
- SH7_2 Migration
- SH7_3 Population dynamics: households, family and fertility
- SH7_4 Social aspects of health, ageing and society
- SH7_5 Sustainability sciences, environment and resources, ecosystem services
- SH7_6 Environmental and climate change, societal impact and policy
- SH7_7 Cities; urban, regional and rural studies
- SH7_8 Land use and planning
- SH7_9 Energy, transportation and mobility
- SH7_10 GIS, spatial analysis; digital geography

SH8 Studies of Cultures and Arts

Social anthropology, studies of cultures, studies of arts

- SH8_1 Kinship; diversity and identities, gender, interethnic relations
- SH8_2 Religious studies, ritual; symbolic representation
- SH8_3 Cultural studies and theory, cultural identities and memories, cultural heritage
- SH8_4 Museums, exhibitions, conservation and restoration
- SH8_5 History of art and of architecture
- SH8_6 Architecture, design, craft, creative industries
- SH8_7 Music and musicology; history of music
- SH8_8 Visual and performing arts, screen, arts-based research
- SH8_9 Digital approaches to anthropology, cultural studies and art

The research domains with Romanian-specific are Romanian language and literature and Romanian law. The Humanities and Social Sciences Commissions of the CNCS will examine applications submitted in Romanian and will decide on the justification of their use.

The list of scientific domains within which the projects are ranked

Domain	Areas of research
Mathematics	PE1_1; PE1_2; PE1_3; PE1_4; PE1_5; PE1_6; PE1_7; PE1_8; PE1_9; PE1_10; PE1_11; PE1_12; PE1_13; PE1_14; PE1_15; PE1_16; PE1_17; PE1_18; PE1_19; PE1_20; PE1_21; PE1_22.
Informatics, computers and information technology	PE6_1; PE6_2; PE6_3; PE6_4; PE6_5; PE6_6; PE6_7; PE6_8; PE6_9; PE6_10; PE6_11; PE6_12; PE6_13; PE6_14.
Chemistry	PE4_1; PE4_2; PE4_3; PE4_5; PE4_6; PE4_7; PE4_8; PE4_9; PE4_11; PE4_12; PE4_13; PE4_14; PE4_15; PE4_18; PE5_9; PE5_11; PE5_13; PE5_16; PE5_17; PE5_18; PE11_9; PE11_11.

Theology	SH8_2

Appendix 2-Minimal eligibility standards for the Project Director

For Natural Sciences, Exact Sciences and Engineering Sciences (according to Appendix 1)

Publication, in the period 2015-2026, after obtaining the PhD title, as main author (according to *Appendix 6*), of a minimum **3 articles** (classified with the type of document (*document type*) *article, review or proceedings paper*) published in journals indexed in Web of Science Core Collection (Science Citation Index Expanded, Social Sciences Citation Index or Arts & Humanities Citation Index) among the first 50% (quartile Q1 [red zone] or quartile Q2 [yellow zone] by Article Influence Score - AIS) within a subdomain/Web of Science Category established by Clarivate.

Notes:

- There will be taken into consideration only the articles that are visible in Web of Science on the date of verification of the minimal eligibility standards.
- There will be taken into consideration the classification of the journals indexed in Web of Science, according to the AIS value, from the article's publication year. The reference lists can be found on UEFISCDI's site at the link: <https://uefiscdi.gov.ro/liste-referinta>.
- For the articles published between 2025- 2026, the classification of Web of Science indexed journals will be considered, depending on the AIS value, according to the JCR-2024 (edition June 2025).
- In the case of journals classified in several subdomains, the most favorable classification for the Project Director will be considered, taking into account the domain of the project proposal.
- Minimum 2 of the reference articles must be from different journals, and at least 2 must be classified with the type of document (*document type*) *article*.
- For the domain *Informatics, computers and information technology*, there can be considered for maximum 2 out of 3 articles from the standard also articles published in CORE conferences classified at the time of publication of the respective article ranked A or A*; therefore, the standard can be met with 2 conference papers and one journal paper. There are considered only papers published at conferences as *full papers*, in the conference *proceedings* and presented at the respective conference. There are excluded papers such as *poster, brief/short paper, abstract/extended abstract, demonstrator*, etc.

For Social and Economic Sciences (according to Appendix 1)

There will be taken into consideration the following types of publications from the period 2015-2026, after obtaining the PhD title:

1. **Published books (C) as author or co-author;**
2. **Published chapters (K) as author or co-author in collective volumes;**
3. **Published articles (A) as author or co-author in journals indexed in Web of Science Core Collection (Science Citation Index Expanded, Social Sciences Citation Index or Arts & Humanities Citation Index) among the first 50% (quartile Q1 (red zone) or quartile Q2 (yellow zone) by Article Influence Score (AIS)) within a subdomain/Web of Science Category established by Clarivate.**

Notes:

- There will be taken into account the classification of Web of Science indexed journals, depending on the AIS value, from the year of publication of article i, as well as the distribution on quartiles of the WoS indexed journals corresponding to this AIS. The reference lists can be found on the UEFISCDI's website at <https://uefiscdi.gov.ro/liste-referinta>.

- For articles published between 2025- 2026, there will be taken into account the classification of Web of Science indexed journals, depending on the AIS value, according to JCR-2024 (June 2025 edition).
- The articles must treat exclusively topics from social and economic sciences domain.
- The articles must be classified strictly with the type of document (*document type*) *article or review* and have assigned an *accession number* (the number given by indexing in WOS).
- The books and the collective volumes must have assigned an ISBN.
- For publications as books and chapters in collective volumes, there will be taken into consideration only papers published in the list of publishing houses mentioned in Appendix 7c.

Minimal eligibility standard for social and economic sciences:

$$P \geq 50 \text{ și } \sum_{i=1}^n Ai \geq 25$$

$$P \geq \sum_{i=1}^n A_i + \sum_{i=1}^m C_i + \sum_{i=1}^l K_i$$

$$P \geq \sum_{i=1}^n A_i + \sum_{i=1}^m C_i + \sum_{i=1}^l K_i \text{ și } \sum_{i=1}^n Ai \geq 25$$

$$A_i = \frac{70}{N} \times AIS$$

$$C_i = \frac{60}{N}$$

$$K_i = \frac{30}{N}$$

where A_i is the article i , C_i is the book i , and K_i is the chapter i . AIS is the Article Influence Score, and N is the number of authors of article i . n is the total number of articles, m is the total number of books, and l is the total number of chapters from the collective volumes.

Minimum score (P) ≥ 50 și $\sum_{i=1}^n Ai \geq 25$

For Humanities (according to Appendix 1)

Accumulation for the period 2015-2025, but after obtaining the PhD title, of a minimum 40 points from publications quantified according to the following table and to the attached notes to this table. At least 20 points must be accumulated (summatively) from publications related to categories 1, 3, 5.1 and 6.1.

Publication	Cat.	Place of publication	Quality standard	Score	
Authored books. Books of theories of interpretation, respectively that of the musical composition. Reference catalogues for visual arts and architecture domains. Critical editions of sources with special editing difficulty.	(1)	Publishing house from abroad (excepting the Republic of Moldova and Hungary)	Minimum 30 entries in the catalogues of some libraries from abroad	100	
	(2)	Publishing house from Romania (CNCS – category A, B) the Republic of Moldova and Hungary	Minimum 10 entries in the catalogues of some libraries from abroad	50	
Editing a) study volumes; b) thematic supplements of some journals; c) dictionaries/encyclopedias	(3)	Publishing house from abroad (excepting the Republic of Moldova and Hungary)	Minimum 30 entries in the catalogues of some libraries from abroad	50	
	(4)	Publishing house from Romania (CNCS – category A, B) the Republic of Moldova and Hungary	Minimum 10 entries in the catalogues of some libraries from abroad	25	
Studies/ Specialty articles published in:	(5)	Journals indexed in:	(5.1) Web of Science Core Collection (Science Citation Index Expanded, Social Sciences Citation Index or Arts & Humanities Citation Index); SCOPUS	Q1 and Q2, according to AIS/SJR	40
			(5.2) Web of Science Core Collection (Science Citation Index Expanded, Social Sciences Citation Index or Arts & Humanities Citation Index, Emerging Citation Index); SCOPUS; CNCS	CNCS - category A and B	20
	(6)	Collective volumes published by a publishing house from:	(6.1) from abroad (excepting the Republic of Moldova and Hungary)	Minimum 30 entries in the catalogues of some libraries from abroad	20
			(6.2) from Romania (CNCS - category A, B), the Republic of Moldova and Hungary	Minimum 10 entries in the catalogues of some libraries from abroad	10

Notes:

1. The CNCS classifications are:

a) journals:

http://www.cncs-nrc.ro/wp-content/uploads/2021/01/categorii.Reviste.CNCS_.2020.2.pdf;

Appendix 7a

b) publishing houses:

http://www.cncs-nrc.ro/wp-content/uploads/2020/12/categorii.Edituri.Site_.CNCS_.2020.pdf;

Appendix 7b

2. The calculation of the score is taken into account only after the condition of identity between the application's domain and the rating domain of the publishing house or journal is met by CNCS.
3. For articles published in journals and in thematic supplements of some journals, only those available online in CEEOL, WOS/Clarivate or other digital databases/libraries will be considered. Confirmation links will be attached for this category of publications.
4. For entries in the online catalogues (www.worldcat.org, www.kvk.bibliothek.kit.edu, www.ccf.fr.bnf.fr or similar), there will be taken into consideration only libraries from European Union states (excluding Romania and Hungary), Australia, Canada, Chile, South Korea, Switzerland, Iceland, Israel, Japan, Great Britain, Mexico, New Zealand, Norway, United States of America, Turkey. A printscreen (in pdf. format) with the number and name of the libraries will be attached.
5. For volumes in the domains of Visual Arts, Cinema, Music, Theatre and Performing Arts, the minimum number of entries in online catalogues is 15 in categories 1, 3, 6.1, respectively 5 in categories 2, 4, 6.2 respectively 5 in categories 2, 4, 6.2 as well as for volumes published between 2024-2026 in all domains of the Humanities.
6. In the case of books published in open-access regime, it is not necessary to meet the criterion regarding the minimum number of entries in the catalogues of some libraries. There are considered to be open-access exclusively the publications made available in full and free of charge on the official platform of the publishing house or in a recognized institutional repository, as part of the publishing house's editorial policy. There are not considered open-access equivalent versions uploaded by the author on platforms such as ResearchGate, Academia.edu or on other academic network platforms or personal websites. For this category, the official link of the publishing house that certifies the open-access availability of the volume will be attached.
7. For publishing houses from abroad with affiliation in several states, there will be taken into consideration the place of appearance most favorable for the Project Director.
8. Critical edition of sources with special difficulty of editing means the publication of a volume containing relevant documentary sources for at least one discipline in the Humanities, whose origins have no time restriction if they come from manuscripts, and the editing involved the following activities: 1. (re)establishing the original text; 2. editing the text by using special paleographic/epigraphic/linguistic knowledge; 3. elaboration of an introductory contextualizing study and ample explanatory notes.

Appendix 3 – Application Form

Application Form - PN-IV-RU-SC-TE-2026-2

The document, including CV, is in A4 format, uses Times New Roman font, 11 - point font size, 1.15 line spacing and 2 cm margins. Any modification to these parameters is forbidden. It is permitted to use 9-point font size for the figures and their captions. The mandatory sections of the application must be maintained. The text marking the information (explanatory text) within each section can be deleted.

The funding applications that do not comply with these rules will be declared ineligible and will be disqualified from the evaluation process.

This document must be uploaded imperatively as an unprotected PDF file (document generated from a word processor file to a PDF, no scanned document) on the submission platform.

A. Identification information (will be filled in the platform)**A1. Host institution****A2. Project Information**

- Project title:
- Summary (a brief overview of the objectives, research methodology, expected research results and impact) - *max. 1.500 characters including spaces*:
- Acronym:
- Main Domain /Main Subdomain /Main research area:
- Secondary Domain/Secondary Subdomain/Secondary research area (if case):
- Tertiary Domain/Tertiary Subdomain/Tertiary research area (if case):
- Keywords (list 5-10 scientific keywords):
- Project Duration (months):
- Total Funding Requested (lei/euro):

The B section will be uploaded into the platform as a single document!

Project description

The explanatory text can be deleted.

Maximum 10 pages (without CV of Project Director, Budget and Bibliography) using 11 – point font size, 1.15 line spacing and 2 cm margins, will be at the applicant's disposal to address the following aspects:

B1. Project Director's Performance

- *describe the research conducted to date in the relevant field, the results obtained so far as well as the relevance of these preliminary undertakings to the current proposal;*
- *describe the most important contributions in her/his research domain (e.g. development of new research directions, elaboration of research theories, methods, strategies and techniques, findings or results that have significantly led to a better knowledge in the domain, demonstrated through reference publications and patents);*
- *describe the expertise and capacity to implement research projects.*

Present the CV and track record (uploaded as a single document of maximum 4 pages), using the template from Annex 3.1

B.2. Research Project

In this chapter, the scientific context, goal, objectives, how the objectives will be implemented (project activities), deliverables and necessary resources will be mentioned in detail.

B 2.1. Ambition and feasibility

- *describe the scientific motivation of the project theme compared to the current „state of the art” in the field, by referring to:*
 - *novelty and originality; if the proposed theme has been addressed in previous projects, their details will be indicated (the funder, title and project code, website, obtained results, the grade obtained at the final evaluation) and the novelty elements in relation to previous studies will be clearly mentioned.*
 - *research methodology to achieve the scientific goals of the project;*
- *describe the existing research infrastructure (the link to the platform <https://eertis.eu/> will be indicated) which will support the research objectives.*

B.2.2. Impact

- *describe the expected research results and their anticipated scientific impacts in the broader scientific field;*
- *describe the potential impact of the project on the Project Director and the team members;*
- *describe the potential impact of the project over the scientific, technological, social, economic or cultural environment (if they are relevant to the domain or theme of the project), including the opening of new opportunities in science, technology etc.*

B.2.3. Work plan and schedule

- *describe the work plan and the structure of the research team (responsibilities for each member of team) and appropriateness for developing the research team;*
- *describe the specific investigations or experiments that are required and/or planned to reach the set goals. Assess the risks involved and propose alternatives if necessary;*
- *a Gantt Chart or timeline related to the research activities, deliverables and milestones must be presented;*
- *describe the dissemination process, mentioning the form in which you wish to publish your research results (articles, monographs, conference proceedings etc);*
- *describe how open science practices (e.g. Open Access to publications, research data management, citizen science, and other) are implemented and show how their implementation is adapted to the nature of work,*

therefore increasing the chances of the project to deliver on its objectives. If the applicants believe that none of the open science practices apply to their project, then they should provide a justification;

- describe the practices for research data management (RDM) used in the project in line with FAIR principles (Findable, Accessible, Interoperable and Reusable). Should the proposal be funded, a plan for data management (DMP - Data Management Plan) will be developed in the project within the first 6 months of implementation;
- describe how gender equality, inclusion and diversity are to be implemented within the project.

B.2.3.1. Budget

The types of expenses on which the budget is distributed are: personnel expenses, logistics expenses, travel expenses and indirect expenses (overheads).

The following aspects will be presented in detail:

- (1) distribution of the budget by types of expenses and by project years must be indicated and justified; For the personnel expenses the total number of PM (Person Months) for each personnel category (researchers, PhD students) must be detailed.
- (2) justification of the purchase of major equipment by referring to the already existing research infrastructure and project objectives/activities;
- (3) the minimum number of hours/month to be dedicated to the project for the Project Director will be specified.

Pre-calculation estimate (in lei, per calendar year):

Budget chapter	Year I (lei)	Year II (lei)	Total budget (lei)
Personnel expenses			
Logistics expenses			
Out of which the value for the equipment expenses			
Travel expenses			
Indirect expenses			
Total			

Pre-calculation estimate (in Euro, at the project level):

Budget chapter	Total budget (euro)
Personnel expenses	
Logistics expenses	
Out of which the value for the equipment expenses	
Travel expenses	
Indirect expenses	
Total	

B.2.4 Research ethics

If the project involves ethical issues, briefly describe how they are planned to be addressed in line with Law no. 183/2024 regarding the statute of research, development and innovation personnel, the European Code of Conduct for Integrity in Research from ALLEA⁹, as well as other legislative ethics regulations specific to the research field of the project.

B.2.5. Bibliography

⁹ <https://www.alleageneralassembly.org/wp-content/uploads/2023/06/European-Code-of-Conduct-Revised-Edition-2023.pdf>

Track record

A list of maximum ten most important scientific outputs (publications, patents, technologies etc).
--

Narrative CV

A narrative summarizing which work has had the greatest importance and impact.
--

Appendix 4 – Individual evaluation sheet/ Intermediary Evaluation Report/ Consensus report/Final Evaluation Report

Please deliver your comments for each sub-criterion as a bullet point list of strengths (+) and weaknesses (-).

Please respond to all relevant tasks indicated in the Evaluation sheet.

1. Project Director - 40% of the total score

See Section B.1 from the funding application and CV of Project Director.

The proven scientific capacity to propose and successfully lead relevant research activities with major scientific impact.

- To what extent has the Project Director demonstrated the ability to conduct exploratory research;
- To what extent does the Project Director provide evidence of creative independent thinking;
- Evaluate to what extent the achievements of the Project Director are internationally acknowledged;
- Evaluate the experience of the Project Director to lead international and national projects, to train and mentor young researchers;
- Comment regarding the extent to which the research directions/theories/methods/strategies/techniques developed by the Project Director have been widely accepted and recognized by the international scientific/academic community;
- Evaluate to what extent the Project Director's research output is relevant for the present project. Assess the quality and appropriateness of the researcher's existing professional experience in relation to the research proposal. Comment on how the previously published work or previous projects relates to the proposed research.

The evaluation of the performance of the Project Director is done in accordance with the principles set out by CoARA.¹⁰

2. Research Project - 60% of the total score

2.1 Ambition and feasibility - 50% of the total score of Criterion 2

See Section B.2.1 from the funding application.

- To what extent the proposed research addresses important challenges and has the scientific potential;
- Comment on the originality and novelty of the proposed solution and assess the extent to which the proposed work is ambitious and goes beyond the current state of the art in the field;
- To what extent the proposed research methodology contributes to achievement of the project's objectives;
- To what extent does the proposal involve the development of novel methodologies, if applicable;

¹⁰ <https://www.coara.org/agreement/the-agreement-full-text/>

- The effects that the proposed research may produce upon the scientific knowledge;
- Evaluate whether the problem/issue addressed by the project is clearly identified in relation to the state-of-the-art in the field;
- If previous projects of the applicant addressing a similar topic are mentioned, comment on the novel aspects investigated in the present project.

2.2 Impact - 30% of the total score of Criterion 2

See Section B.2.2 from the funding application.

- To what extent the proposal can lead to significant scientific results with impact in the broader domain;
- To what extent the implementation of the project has an impact on Project Director and the research team;
- To what extent the project objectives have an impact in the scientific, social and economic environment (the opening of new opportunities in science, technology etc).

2.3 Implementation - 20% of the total score of Criterion 2

See Section B.2.3; B.2.3.1, B.2.4 from the funding application.

- Evaluate the clarity and coherence of the research objectives. Are the research objectives realistically achievable, measurable and verifiable?
- To what extent are the proposed timescale and resources necessary, appropriate and adequately justified;
- Assess whether the Gantt Chart (mandatory) is consistent and complete, in relation to the whole work plan (taking into account WPs, scientific deliverables, milestones);
- Comment on the quality of the proposed measures to disseminate the scientific/scholarly output of the proposal;
- To what extent is the scientific approach feasible bearing in mind that the proposed research involves high risk, if applicable;
- To what extent the Open Science practices are well demonstrated;
- To what extent the research data management is convincing and in compliance with the FAIR principles;
- To what extent throughout the project implementation, gender equality, inclusion and diversity are ensured by the host institution;
- To what extent the ethical issues are appropriately addressed (if applicable).
- Provide an overall assessment of the research budget requested and evaluate to what extent it is justified by the proposed research activities.

Recommendations for Evaluators/ Rapporteurs:

1. Propose a score **only after** consensus has been reached on the comments; make sure that the comments are **concrete, complete** (i.e. address all questions) and **consistent** with the semantics of each score, namely:

Table 1.

0	ABSENT	The proposal fails to address the criterion under examination or cannot be judged due to <i>missing or incomplete information</i> .
1	UNSATISFACTORY	The criterion is addressed in an <i>inadequate manner</i> , or there are <i>serious inherent weaknesses</i> .
2	SATISFACTORY	While the proposal <i>broadly addresses</i> the criterion, there are <i>significant weaknesses</i> .
3	GOOD	The proposal addresses the criterion <i>well</i> , although <i>improvements would be necessary</i> . <i>A number of weaknesses/shortcomings are present</i> .
4	VERY GOOD	The proposal addresses the criterion very well, although <i>certain improvements are still possible</i> . <i>A small number of weaknesses / shortcomings are present</i> .
5	EXCELLENT	The proposal successfully addresses all relevant aspects of the criterion. Any shortcomings are minor.

2. When scoring each subcriterion use the full scale, from 0 to 5 – in 0.5 increments.
3. The scores must reflect the strengths and weaknesses and they must be in line with the comments. Scores **below 5, including 4.5, must be in accordance with the identified weaknesses, which should be clearly indicated** in the evaluation sheet.
If no weakness is identified, the score is 5.
4. Each strength and weakness must be reflected **only once** in the report and the scores, i.e. there is **no double penalty, no double reward**.

Note: The final score will be calculated as a weighted sum of the scores for each subcriteria multiplied by 20 (final score between 0 and 100);

Final grade = 20*[s1*40/100 + (s2.1*50/100 + s2.2*30/100 + s2.3*20/100)*60/100], where si.j is the score for criterion/subcriterion i.j

Appendix 5.1 - Affidavit about complying with the definition of the research organization

Affidavit about complying with the definition of research organization

The undersigned,(*surname and name of the legal representative of the research organization*), as (*position of the legal representative*) of (*full name of the research organization*), declare on my own responsibility that the following conditions about complying with the definition of research organization are met:

- It is an entity¹¹, regardless of its legal status (public or private law organization) or the method of funding, whose main objective is to independently carry out fundamental research, industrial research or experimental development, or to widely disseminate the results of such activities, through teaching, publication, or knowledge transfer.
- If the entity also carries out economic activities, the funding, the costs and incomes of those economic activities must be separately accounted.
- Enterprises that can exercise decisive influence over such an entity, for example, as shareholders or partners, cannot benefit from preferential access to the results generated by it.

Affidavit on own responsibility, under penalty of forgery in public documents.

¹¹ universities or research institutes, technology transfer agencies, innovation intermediaries, physical or virtual collaborative entities focused on research, including research nuclei established within hospitals or museums, which meet the criteria included in the definition of research organisation

Appendix 5.2 -Affidavit regarding the eligibility of the research organisation

Affidavit on own responsibility regarding the eligibility of the research organization

We declare on our own responsibility that (*full name of the research organization*):

- is not declared, according to the law, in a state of payment default;
- has fulfilled its obligations to pay taxes, fees and social security contributions to the component budgets of the general consolidated budget (state budget, special budgets, local budgets), in accordance with the legal provisions in force;
- it does not have the payments/accounts blocked following a court order;
- the legal representative has not been convicted in the last 3 years, by a final decision of a court, for an act that violated professional ethics or for committing a professional mistake.

Furthermore, the unit is not responsible for:

- inaccurate declarations concerning the information required by Contracting Authority for the selection of contractors;
- seriously breaking the terms of another Funding Contractual Agreement signed previously with a Contracting Authority.

Affidavit on own responsibility, under penalty of forgery in public documents.

Affidavit regarding non-financing from other sources, certification of the legality and correctness of the information contained in the Application Form and the information filled in on the submission platform

The undersigned, (surname and name of the Project Director) declare on my own responsibility that the activities and works within the project proposal with the title: “.....” – submitted to Programme 5.2 – Human Resources, Subprogramme 5.2.1. Start in research – “Research projects to stimulate young independent teams” TE 2026, **are not and have not been funded from other budgetary sources.**

I confirm that the information included in this project proposal, as well as the details presented in the attached documents and the information completed in the submission platform, are legal and correct.

I also confirm that I have not previously benefited from a TE, PCE sau PCCF type research project funded by the National Research, Development and Innovation Plan, as Project Director.

I understand that, if the Application Form is not complete with all requested details and aspects, including this affidavit, the project proposal may be rejected.

Appendix 5.5 - Affidavit of the Project Director certifying compliance with the eligibility criteria for participation in project proposals

**Affidavit on own responsibility of the Project Director
certifying compliance with the eligibility criteria
regarding participation in project proposals**

The undersigned,, director of the project proposal with the title: “.....” submitted to Programme 5.2 – Human Resources, Subprogramme 5.2.1. Start in research – „Research projects to stimulate young independent teams” TE 2026, declare on my own responsibility that:

- I will submit a single project proposal as Project Director, within the PCE2026/TE2026/ PD2026 competitions;
- during the entire period of implementation of this project, I will carry out my activity with a physical presence in the host institution in Romania.

Appendix 5.6 - Affidavit of consent regarding the processing of personal data

Affidavit of consent regarding the processing of personal data

The undersigned,, holding the position of within (*full name of the host institution*), I declare that:

- I have been informed about the provisions of Regulation (EU) 679/26 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data.
- I have been informed that I have the right to access, intervene in my data and the right not to be subject to an individual decision.
- I have been informed that personal data will be processed and stored within UEFISCDI.
- I have been informed that the processing of my personal data is necessary for the legal obligations of UEFISCDI, as well as for the purposes of my interests and rights.
- I have been informed that my personal data is communicated to public authorities, as well as to other competent institutions (e.g. ANAF, ANFP, ITM, ANI, at the request of courts or criminal investigation bodies, etc.).
- I have been informed that for the purpose of accurate processing of my personal data, I have the obligation to inform UEFISCDI of any changes to my personal data.
- I have been informed that I have the right to withdraw my consent at any time through a written, substantiated, dated and signed request, submitted to the UEFISCDI's headquarters, except the case where the processing of my personal data is necessary in connection with the employment/work relationship.

Consequently, I give my consent for the processing, transmission and storage of personal data by UEFISCDI.

Appendix 6 – Definitions

The main author/authors of a publication are considered to be:

- a) **first author**, if the order of the authors of a publication reflects their contribution to the publication;
- b) **corresponding author** (named *corresponding author* or to be found in *the corresponding address* in Web of Science), if this is mentioned.
- c) **other authors whose contribution is explicitly mentioned** within the publication to be equal to the contribution of the first author or corresponding author.
- d) **last author in the case of bio-medical sciences (in addition to those mentioned in a), b) and c)),** her/his contribution being considered equal to that of the corresponding author. These publications must appear in journals indexed by *Journal Citation Reports* in the following categories: *Allergy; Anatomy & Morphology; Andrology; Anesthesiology; Behavioral Sciences; Biochemical Research Methods; Biochemistry & Molecular Biology; Biology; Biophysics; Cardiac & cardiovascular Systems; Cell Biology; Clinical Neurology; Critical Care Medicine; Dentistry, Oral Surgery & Medicine; Dermatology; Developmental Biology; Emergency Medicine; Endocrinology & Metabolism; Entomology; Evolutionary Biology; Gastroenterology & Hepatology; Genetics & Heredity; Geriatrics & Gerontology; Hematology; Immunology; Infectious Diseases; Integrative & Complementary Medicine; Marine & Freshwater Biology; Medical Ethics; Medical Informatics; Medical Laboratory Technology; Medicine, General & Internal; Medicine, Legal; Medicine, Research & Experimental; Microbiology; Neuroimaging; Neurosciences; Nutrition & Dietetics; Obstetrics & Gynecology; Oncology; Ophthalmology; Orthopedics; Otorhinolaryngology; Parasitology; Pathology; Pediatrics; Peripheral Vascular Disease; Pharmacology & Pharmacy; Physiology; Plant Sciences; Primary Health Care; Psychiatry; Public, Environmental & Occupational Health; Radiology, Nuclear Medicine & Medical Imaging; Rehabilitation; Reproductive Biology; Respiratory System; Rheumatology; Surgery; Toxicology; Transplantation; Tropical Medicine; Urology & Nephrology; Veterinary Sciences; Virology; Zoology.* There are also considered the articles from the above domains published in multidisciplinary journals (*Multidisciplinary Sciences*) situated in the *Q1* quartile (red zone) according to *Article Influence Score (AIS)*, from the year of publication of the article, according to *Clarivate*.
- e) **all the authors of a publication**, in the case where, according to the accepted practice in the domain, the order of the authors of a publication does not reflect their contribution to it (in cases where the authors of a publication are ordered alphabetically or are indicated in the form of a collaboration without mentioning explicitly their names); **here there will be taken into account only publications from the following domains: mathematics, mathematical physics, informatics and economics.** These publications must appear in journals indexed in the *Journal Citation Reports* in the following categories: *Mathematics; Physics, Mathematical; Statistics & Probability; Mathematics, Interdisciplinary Applications; Mathematics, Applied; Computer Science (all subdomains); Economics; Business, finance; Management; Operations research & management science; Multidisciplinary sciences.*
- f) **authors who submitted an internal note of approval in order to send for publication**, in the case of publications in the domain of high energy physics in which the authors are indicated in alphabetical order or are indicated in the form of a collaboration without explicitly stating their names. These publications must appear in journals indexed by *Journal Citation Reports* in the following categories: *Physics, nuclear; Physics, particles and fields; Physics, Multidisciplinary.*

Notes:

- 1) The Project Director is obliged to indicate, on the online submission platform of research projects, the publications that are in the exceptional cases mentioned in points c), d), e) and f).
- 2) For publications that are in the exceptional case c) the Project Director is obliged to upload the PDF of the respective publications on the online project submission platform, and in the exceptional case f) the Project Director is obliged to upload on the online project submission platform the proof of support of the internal note of approval for publication.

Critical edition of sources with special editing difficulty

Critical edition of sources with special difficulty of editing means the publication of a volume containing relevant documentary sources for at least one discipline in the Humanities, whose origins have no time restriction if they come from manuscripts, and the editing involved the following activities: 1. (re)establishing the original text; 2. editing the text by using special paleographic/epigraphic/linguistic knowledge; 3. elaboration of an introductory contextualizing study and ample explanatory notes.

CNCS (categories A and B) represents journals, publishing houses from Romania and the Republic of Moldova acknowledged by CNCS, according to the clasification available at the following links:

http://www.cncs-nrc.ro/wp-content/uploads/2021/01/categorii.Reviste.CNCS_.2020.2.pdf ;

Appendix 7a

http://www.cncs-nrc.ro/wp-content/uploads/2020/12/categorii.Edituri.Site_.CNCS_.2020.pdf;

Appendix 7b

AIS-The influence score is a measure which reflects, for a given scientific journal, the average influence of an article from that journal in a 5 years interval after publication, by taking into account the number of citations that the articles from that journal received, weighed with the influence of the journals who are citing the articles. The influence score ("article influence score") is calculated by Clarivate in Journal Citation Reports. It is considered that the journals for which Clarivate does not indicate the article influence score have an influence score equal to zero.

The number of citations of a publication is considered to be that indicated by Web of Science, using the "*Cited Reference Search*" functionality. A citation of an author (Project Director/expert evaluator) is considered to be a self-citation if the author is one of the authors of the citing article.
