

## Anexa 1 – lista organizațiilor propuse de proiectul UNITE ca medii de testare/validare

Locatiile de implementare reprezintă infrastructuri din mediul real, precum spitale, laboratoare clinice și platforme digitale, în cadrul cărora soluțiile inovatoare pot fi pilotate, testate și validate în condiții operaționale. Rolul lor central constă în asigurarea unei legături directe cu utilizatorii finali și cu furnizarea serviciilor, garantând faptul că inovațiile sunt evaluate în medii autentice. La nivelul regiunilor UNITE, au fost identificate 42 de organizații considerate adecvate pentru activitatea de Agile Piloting.

## Mentorat clinic și servicii de suport clinic

Serviciile de mentorat clinic și de suport clinic joacă un rol esențial în stimularea inovării, prin asigurarea implicării directe a profesioniștilor din domeniul sănătății în testarea, validarea și co-dezvoltarea soluțiilor în medii reale. Aceste servicii includ programe structurate în cadrul cărora start-up-urile sunt sprijinite de experți clinici pentru rafinarea produselor și serviciilor dezvoltate, asigurând alinierea acestora la nevoile medicale reale și la standardele de practică.

La nivelul regiunilor UNITE, au fost identificate 29 de servicii de mentorat clinic și suport clinic ca fiind adecvate pentru activitatea de Agile Piloting. Prin implicarea timpurie a clinicienilor în procesul de inovare, aceste servicii furnizează expertiză esențială, validare practică și credibilitatea necesară pentru facilitarea adoptării și creșterea impactului soluțiilor în cadrul sistemelor de sanatate.
