

Stakeholders Consultation

PA02 – “RESEARCH”

February – March 2017

Alina Irimia
Foresight Expert, UEFISCDI

Oslo
March 8th, 2017

Scope: Focus the interest on specific key topics
and identify risks & challenges

Thematic Areas

- **ENERGY**
- **ENVIRONMENT**
- **HEALTH**
- **SOCIAL SCIENCES AND HUMANITIES**
- **ICT**
- **BIOTEHNOLOGY**

*Thematic Areas MoUs EEA Grants, Norway Grants
Romania's Smart specializations + national priorities*

4 Consultation Events

Participants

- Business
- Research institutes
- Universities

- Total no. **218** (in panels)

- +Video streaming:

Bucharest: 47 users (Norway, Romania, Belgium, Slovenia)

Iasi: 23 users (Norway, Romania, Belgium)

Session 1: Bucharest, February 21th

68 Participants

Session 2: Iasi, February 24th

51 participants

Session 3: Cluj-Napoca, February 28th

52 participants

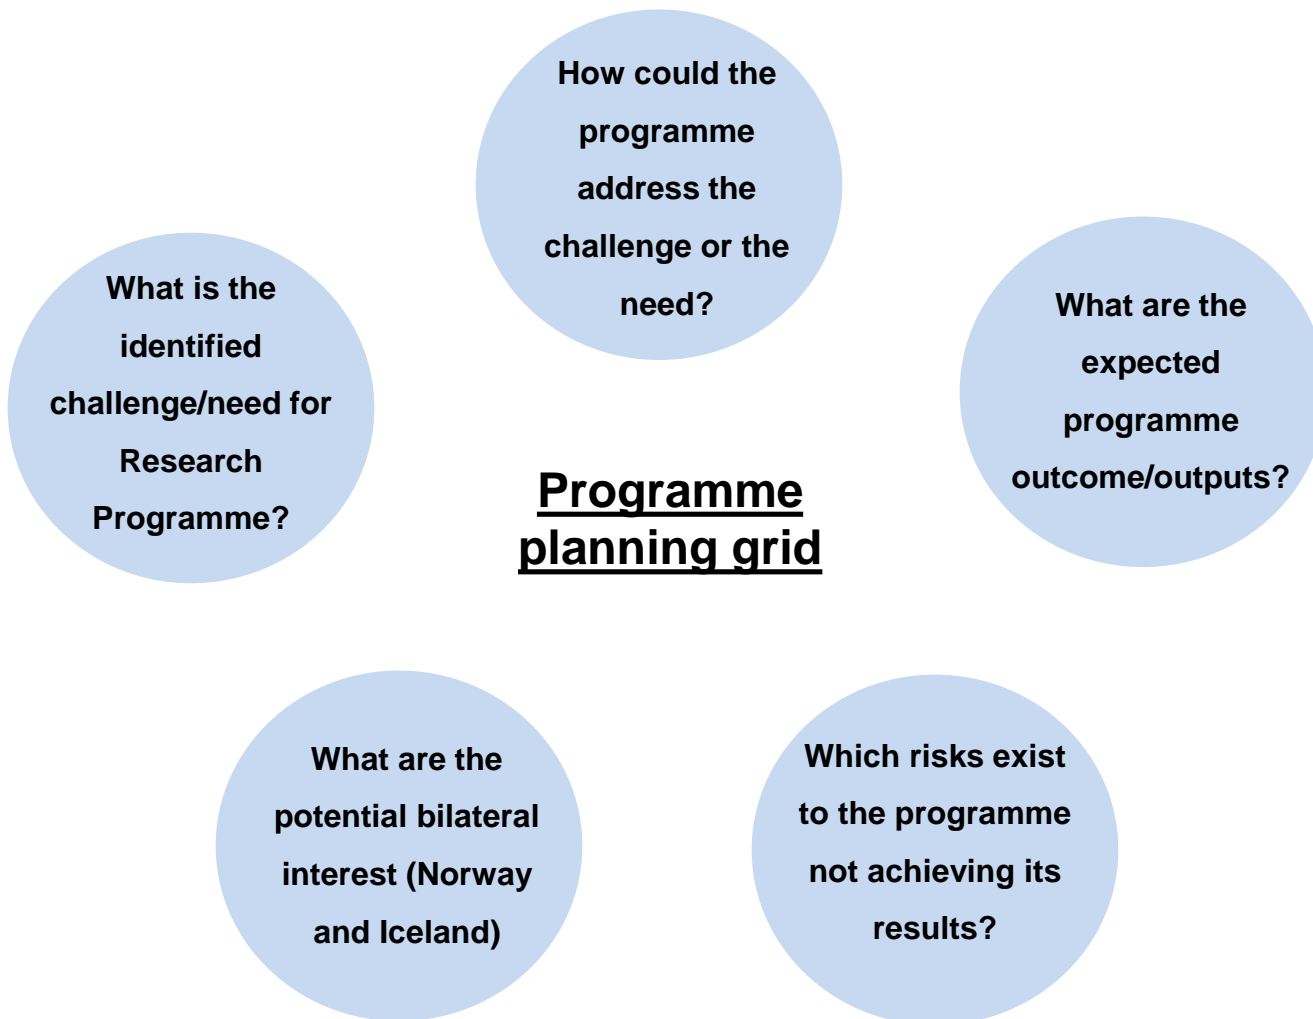

Session 4: Timisoara, March 2nd

47 participants

Consultation Process – Risks & challenges

Consultation Process – Prioritization of key topics

Thematic tables 8-10 participants

Process facilitator at each table

Dots ● ●

Post-its for arguments

- Individual level
- Aggregated – group arguments

Circle with key topics

Topici cheie pentru domeniul ICT
Key topics for ICT

Tehnologii, instrumente și metode pentru dezvoltare software
Technologies, instruments and methods for software development

Robotică avansată și tehnologii pentru fabricația aditivă (3D printing)
Advanced robotics and additive manufacturing technologies (3D printing)

Dezvoltare de tehnologii pentru Internetul Lucrurilor (IIoT)
Development of technologies for Industrial Internet of Things (IIoT)

Calcul de înaltă performanță și noi modele computaționale
High Performance Computing (HPC) and New Models for Computing

Analiza, managementul și securitatea datelor de mari dimensiuni (seturi de tip Big Data)
Big Data analysis – storage, management and security of Big Data

Aplicații ale tehnologiilor de tip Data și Data AI (în domeniul procesului administrativ public, educație, agricultură, sănătate, servicii bancare)
Applications of Big Data and Artificial Intelligence (AI) technologies in domains like public administration, education, agriculture, health, banking)

Securitatea cibernetică și protecția datelor personale
Cyber security and personal data protection in critical infrastructures and services

Protecția infrastructurii și serviciilor critice
Protection of critical infrastructures and services

Criterii orientative:

Capacitatea de inovare și inovare în economie publică, privată și în resurse umane);
Necesitate în economie regională (parteneriate/rețele de colaborare public-privat);
Nivelul de colaborare și interconectare);
Valoarea și impactul resurselor locale (eficiență deciziilor economice – naturale, financiare, administrative, etc.)

List of key topics and criteria for argumentation

Step I. Individual Selection

1.2) Result
a first focus of interest

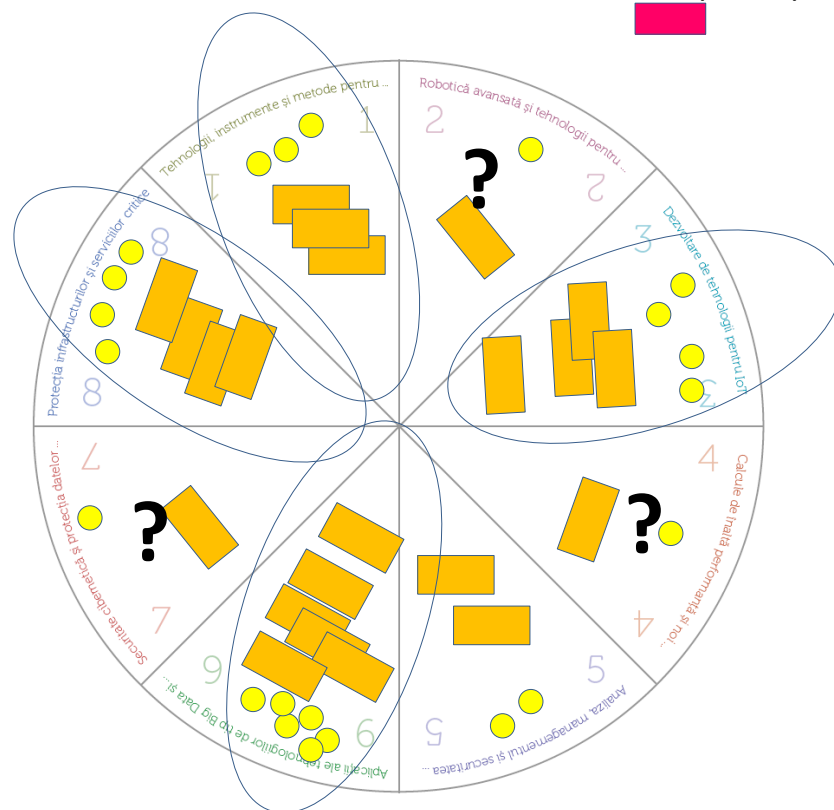

Step II. Group Discussions

II.1) Discussions starting from the first "prioritization" (1h)

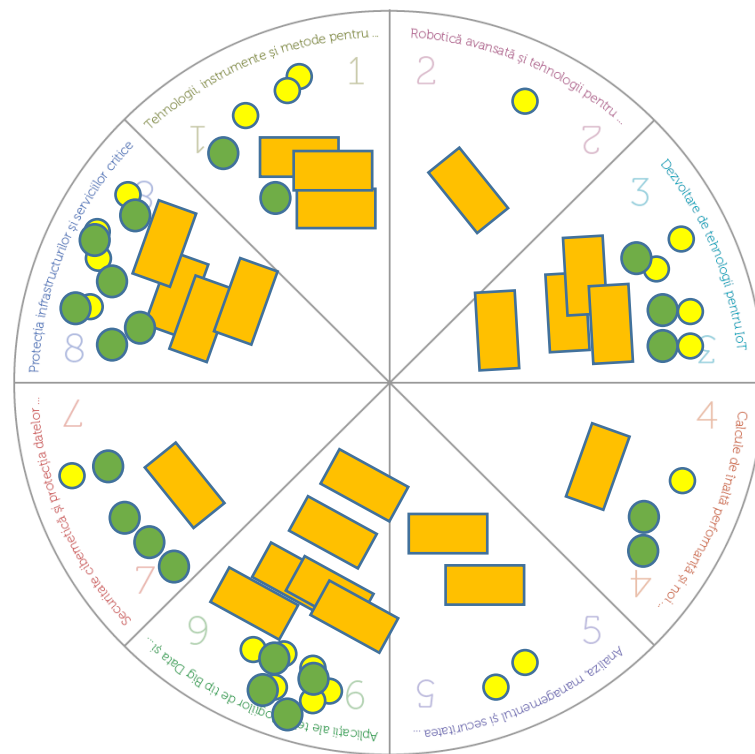

New disruptive topic?

Step II'. Final voting

II.3) A new round of voting Final voting ●

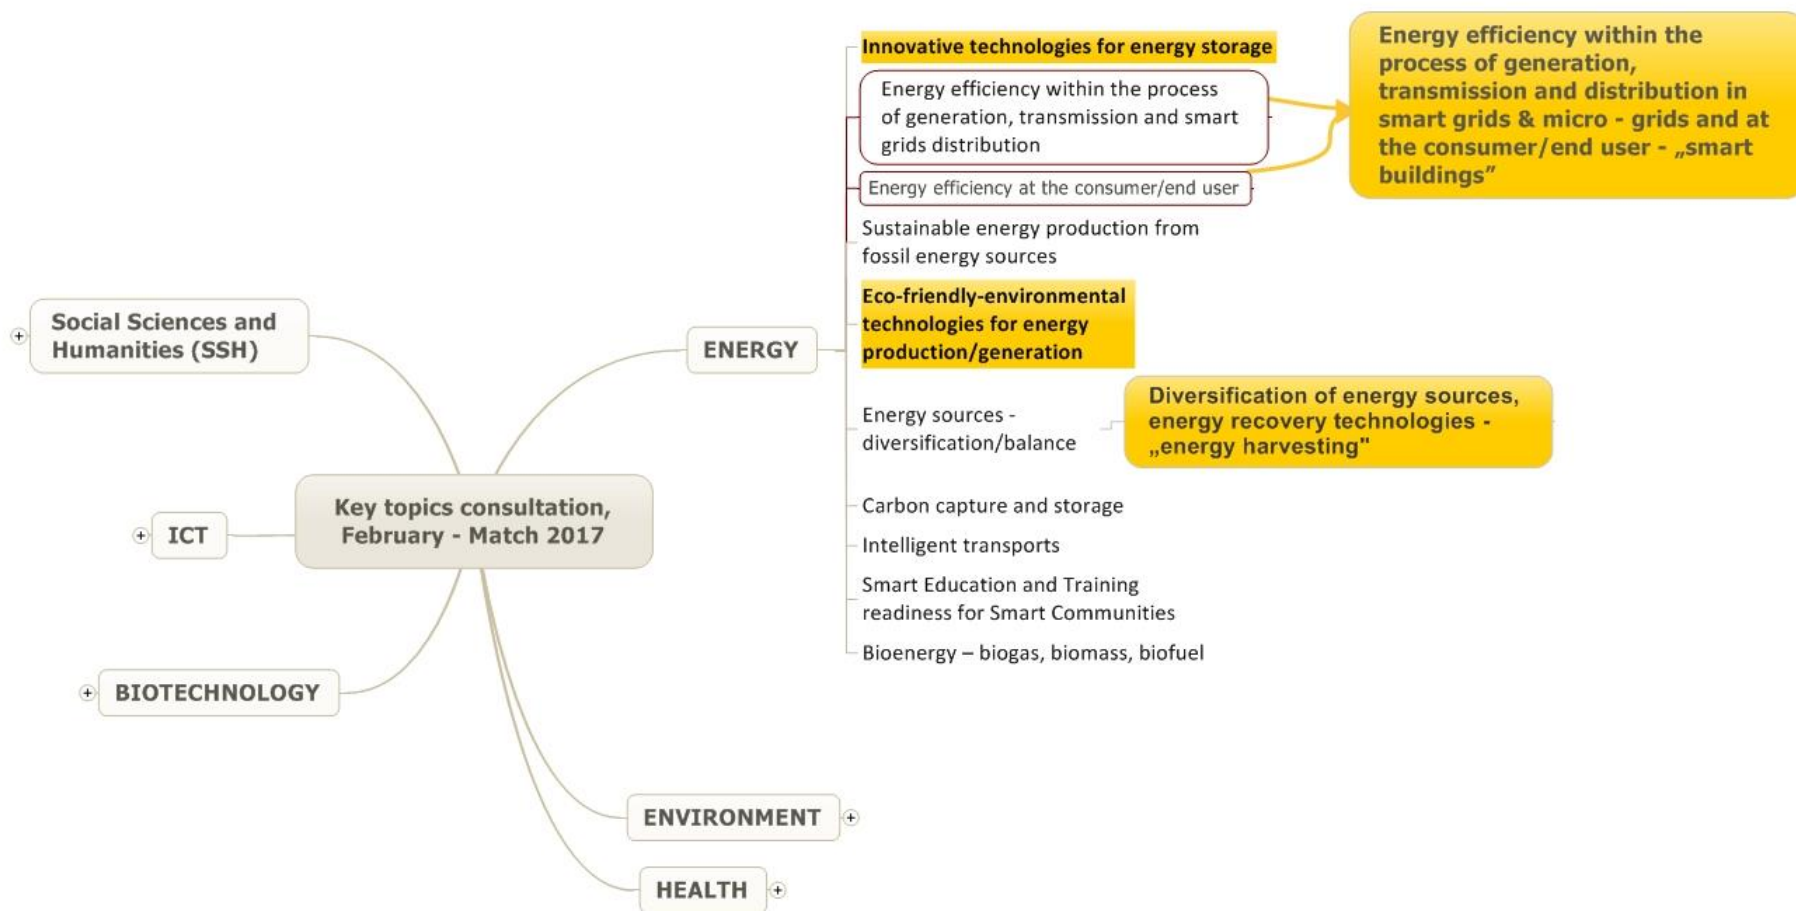

Step III. Presentations of results

II.4) Presentations of the final prioritization

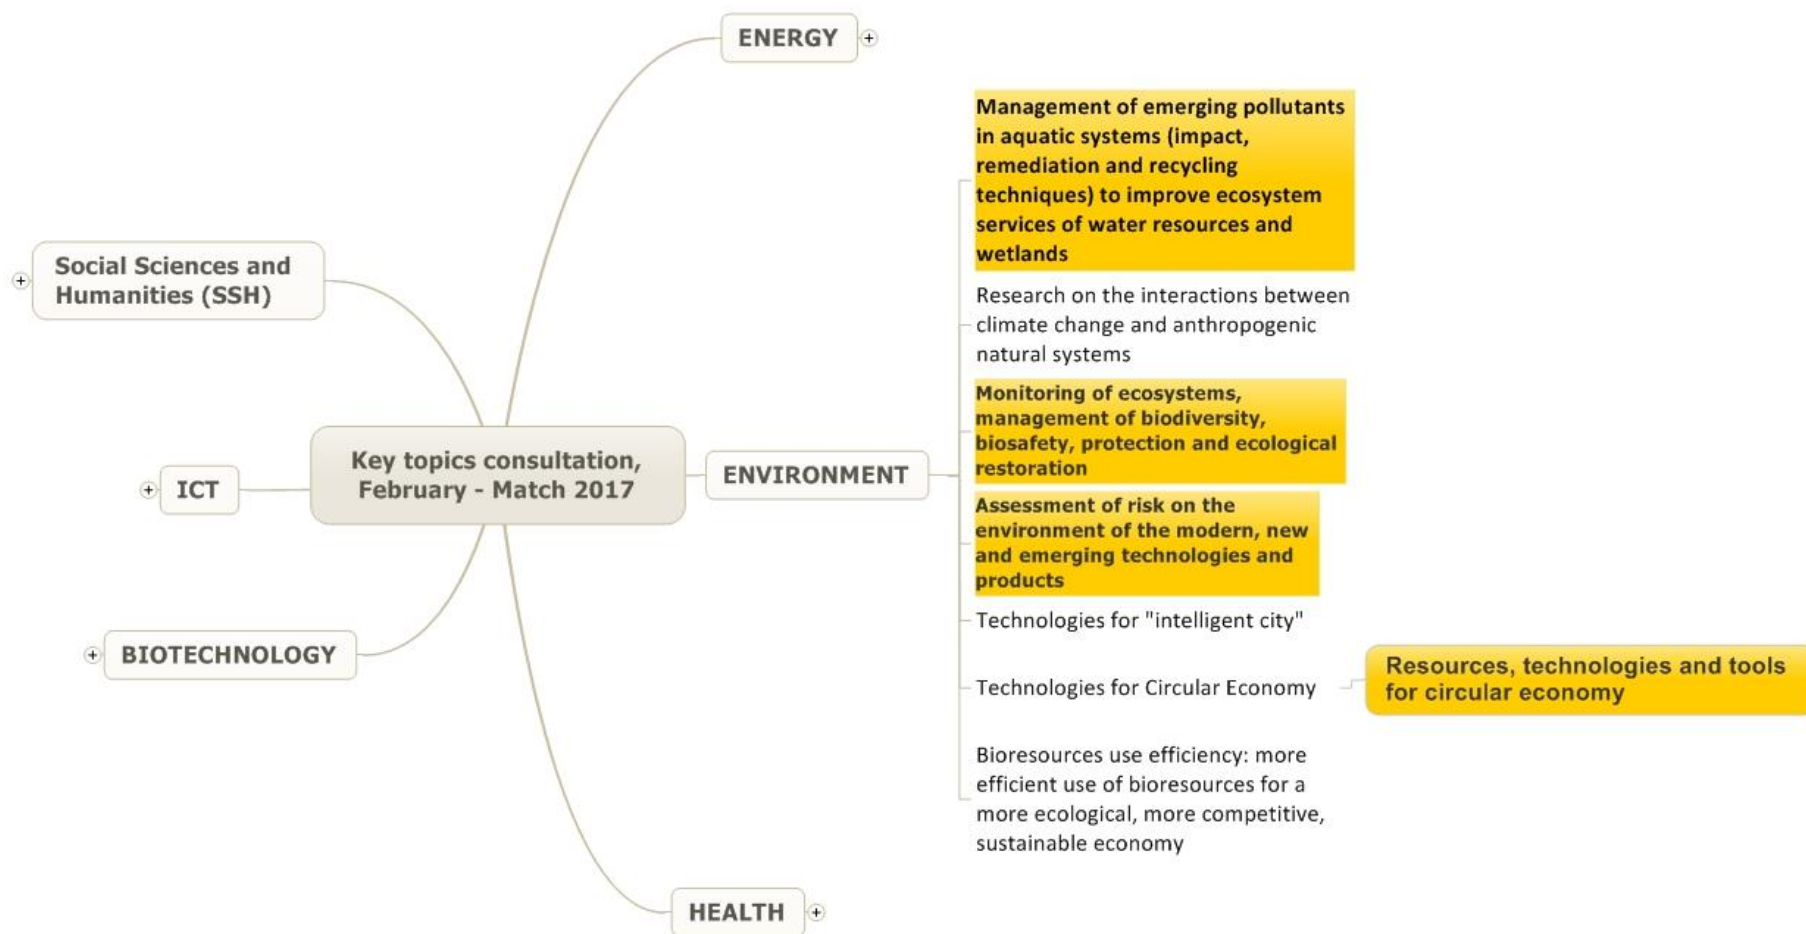

- Aggregated arguments
- Risks and challenges

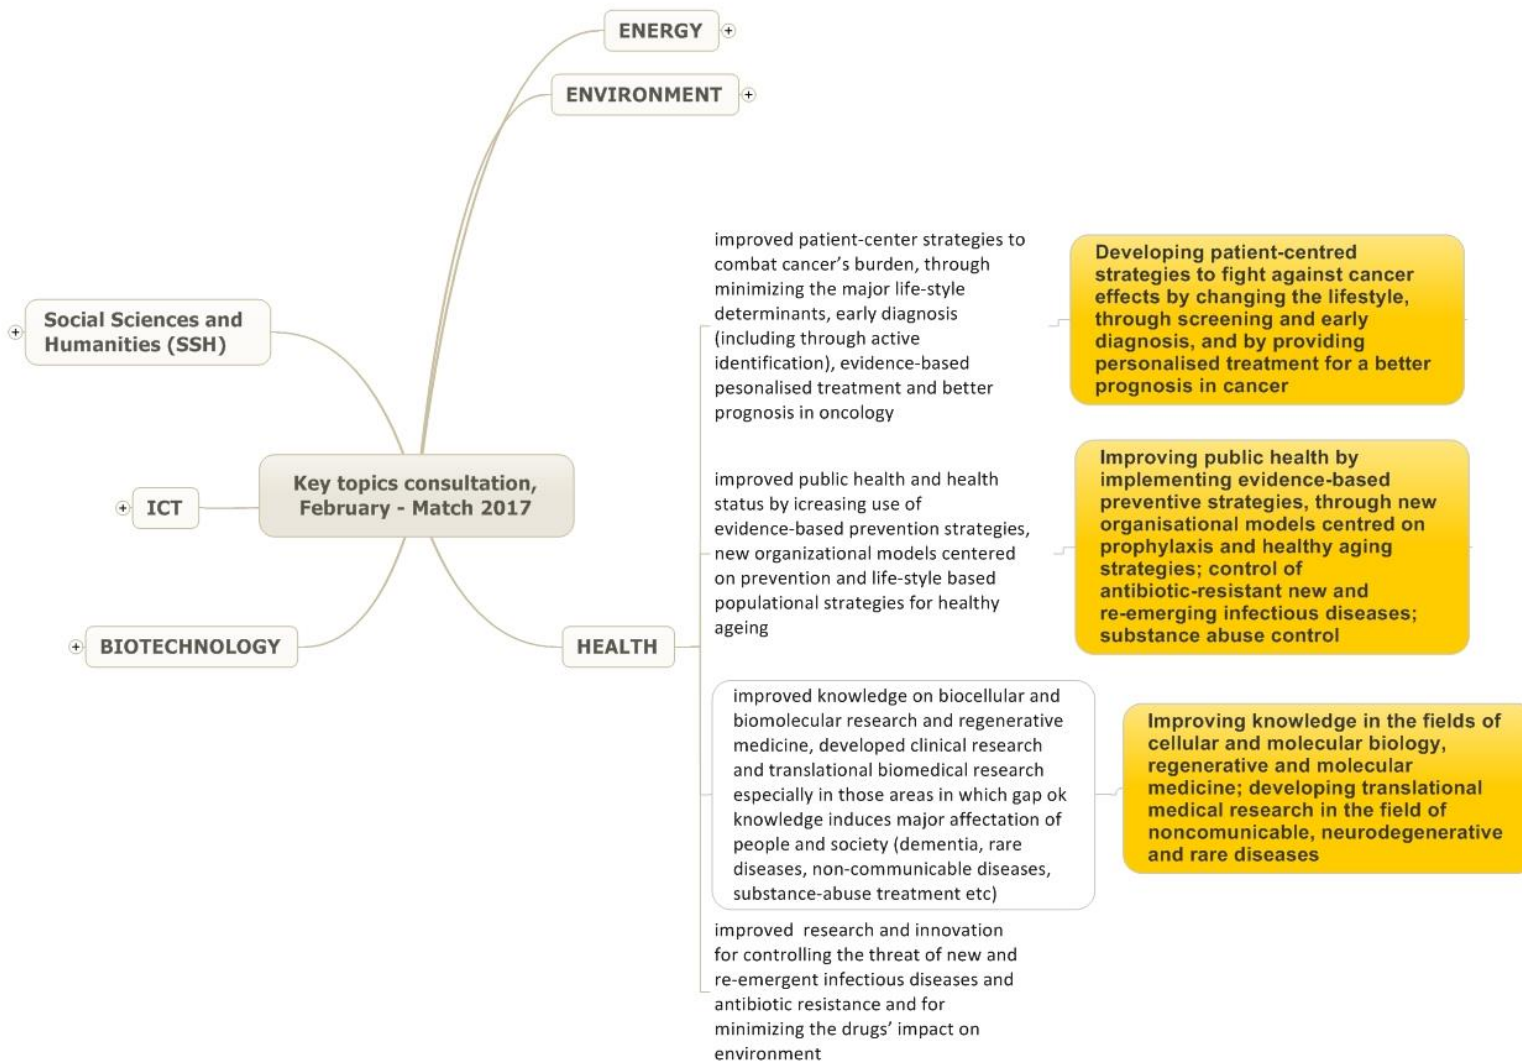

RESULTS - ENERGY

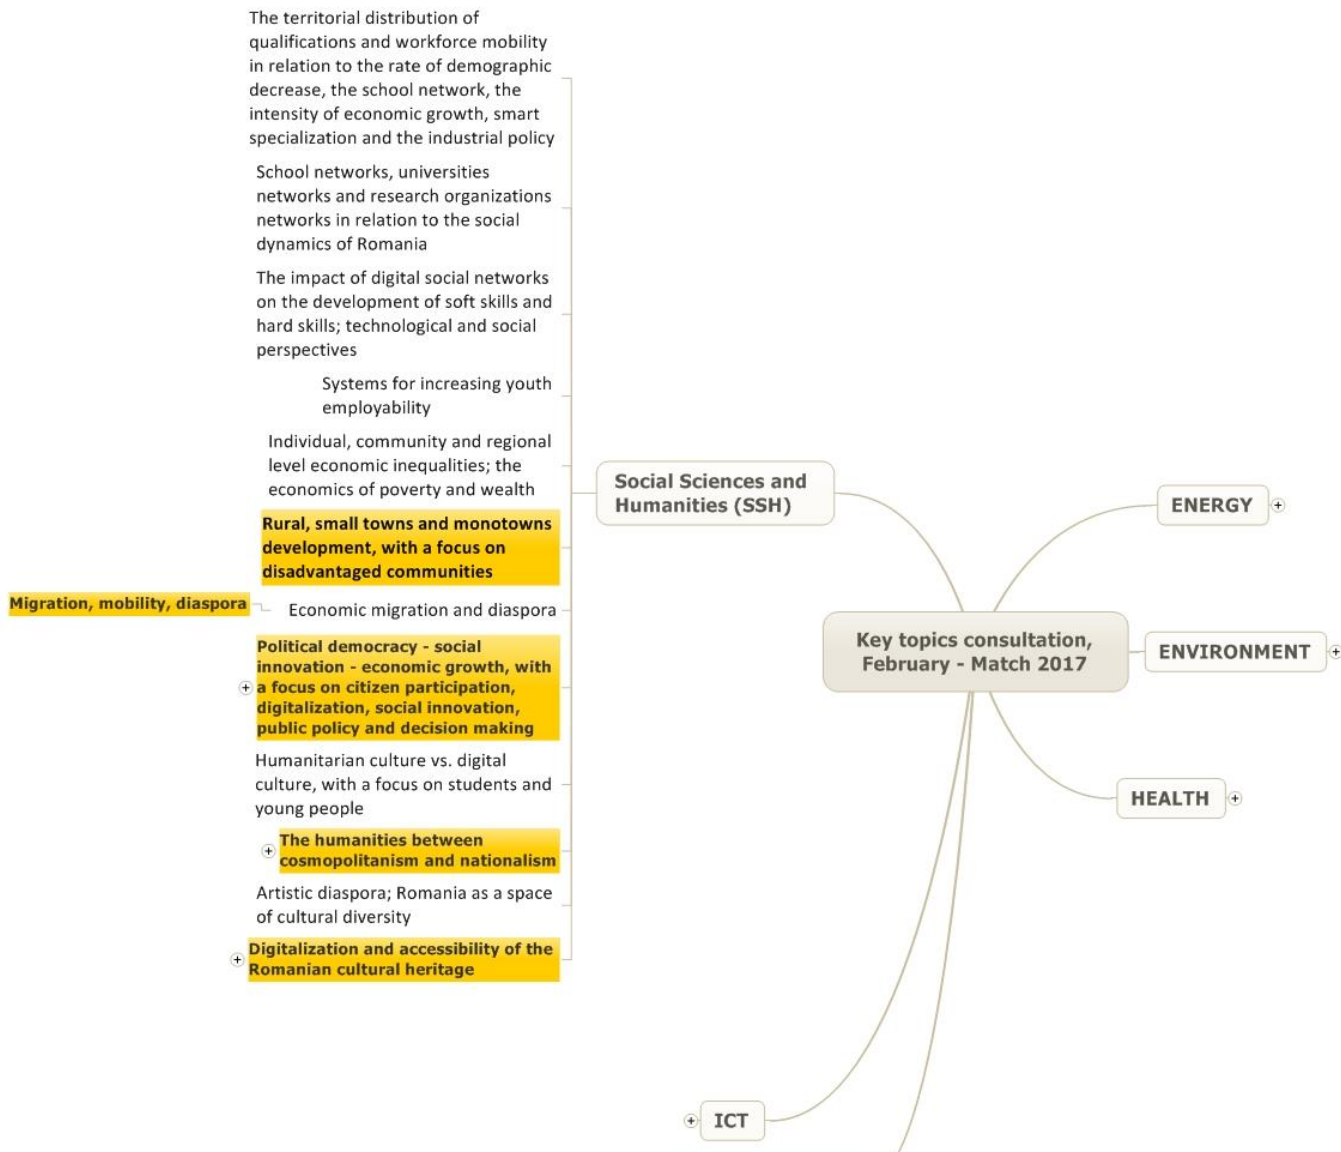

RESULTS - ENVIRONMENT

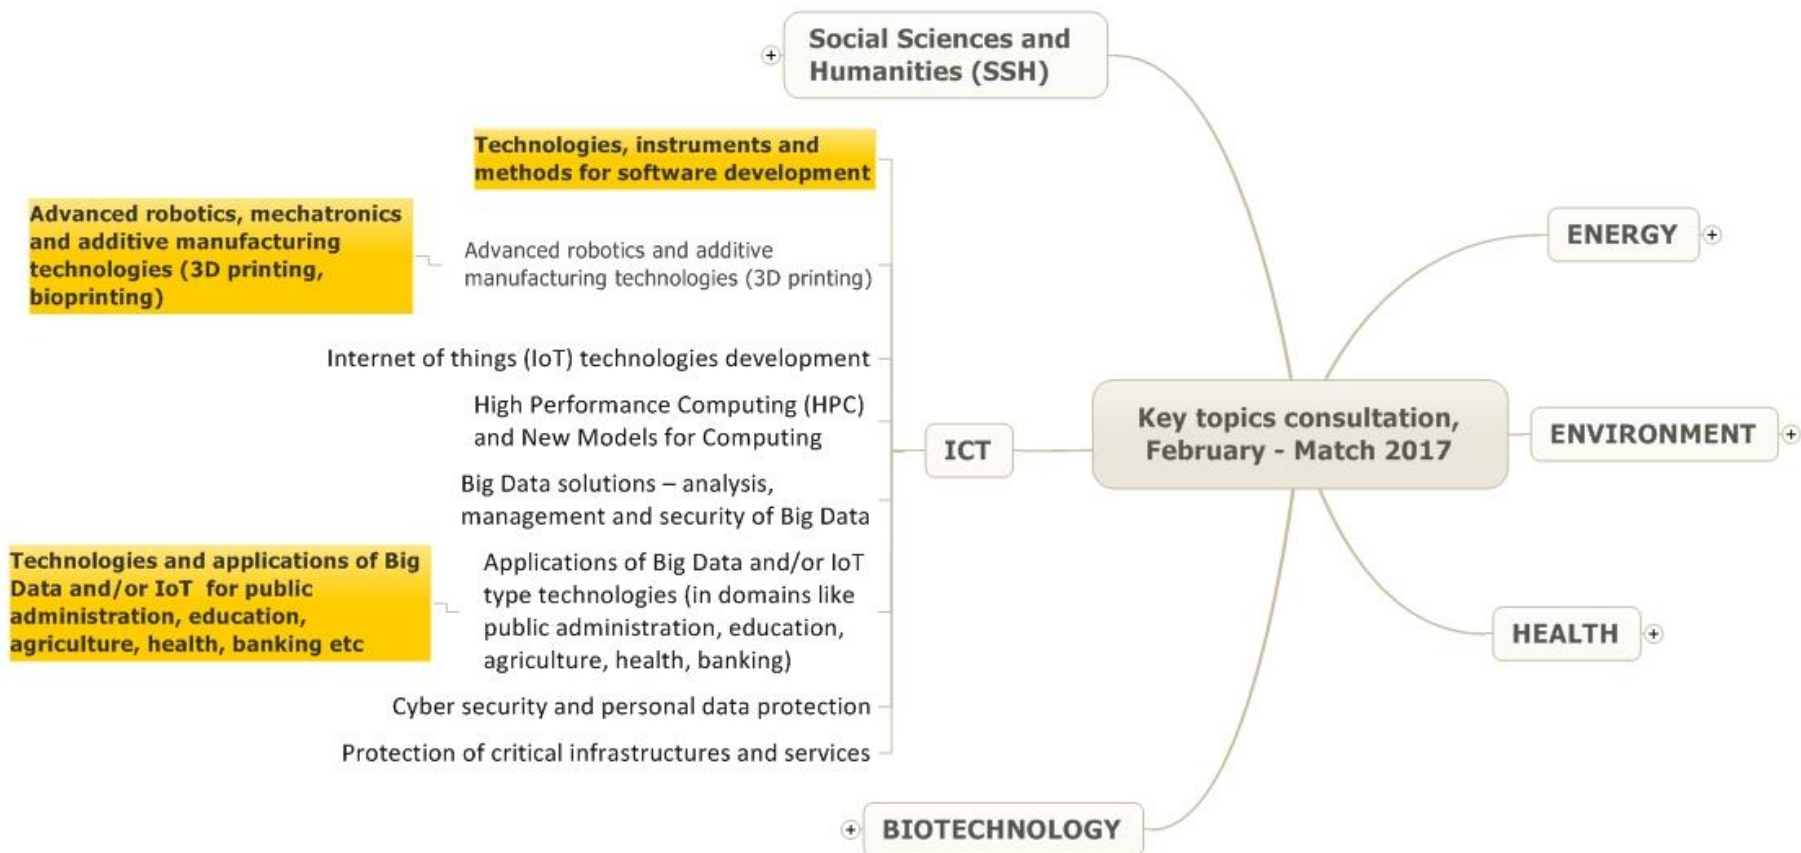

RESULTS HEALTH

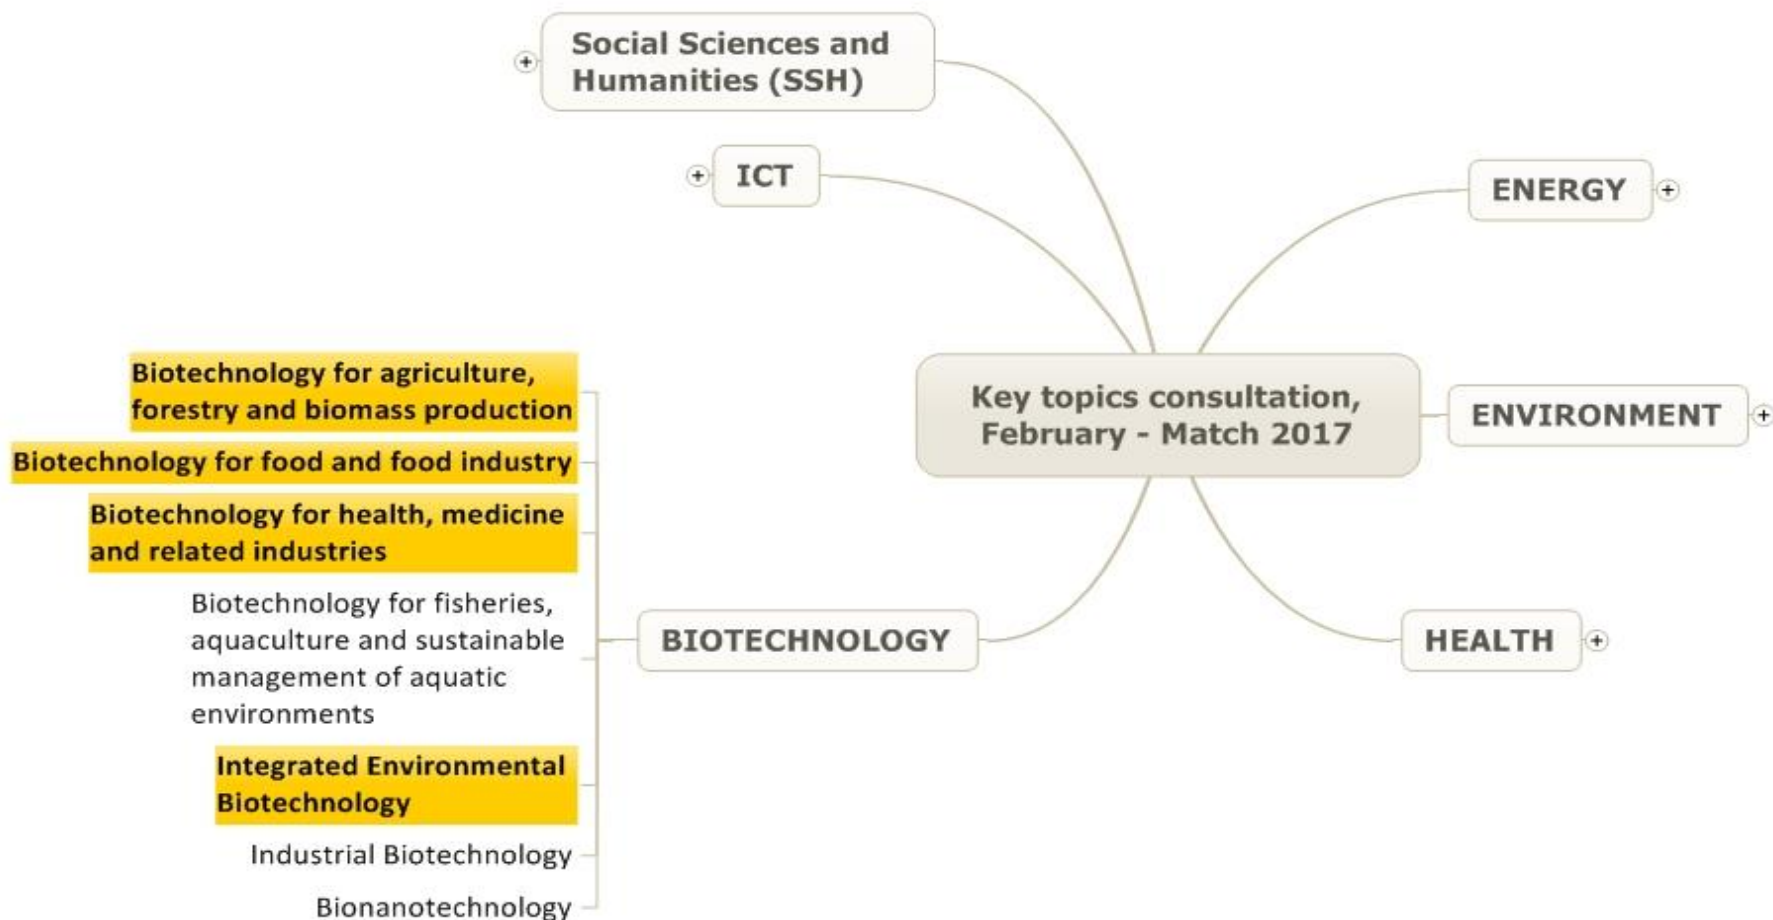

RESULTS SSH

RESULTS - ICT

RESULTS - BIOTECHNOLOGY

Thank you
