

# Health

---

5 centres of excellence in the field of health, covering drug discovery, mental health, cardiovascular diseases, neurosciences and antimicrobial resistance. The largest budget by domain – 429.5 mil. lei

- Integrated multidisciplinary platform for accelerated and innovative therapeutic discovery (0088)
- Mental health in a rapidly changing society: A multi-level approach, from genes and molecules to neural networks and psychosocial systems (0139)
- Center of Excellence for Advanced Translational reSEARCH in CardioVASCular and CerebroVASCular Diseases (0029)
- Establishing the Romanian Center of Excellence in Clinical Neuroscience (NeuRoX) (0141)
- National Multidisciplinary Research Centre of Excellence for Drug-Resistant Infections (0196)

# Mental health in a rapidly changing society: A multi-level approach, from genes and molecules to neural networks and psychosocial systems (0139)

**Purpose:** *establishing the first Romanian Mental Health Biobank, conducting large-scale multicenter studies to analyze risk factors and pathogenetic mechanisms in mental disorders at multiple levels, from genes to psychosocial systems, developing new big data analysis frameworks, and contributing to international consortia in psychiatric genetics and neuroimaging.*

Coordinator: Prof. Andrei MIU - Babeş Bolyai University

Partners:

- Transylvanian Institute of Neuroscience
- Technical University of Cluj-Napoca
- UVT - West University of Timisoara
- Costin D. Nenişescu Institute of Organic and Supramolecular Chemistry
- "Prof. Dr. Alexandru Obregia" Psychiatric Hospital
- Institute of Philosophy And Psychology "Constantin Rădulescu-Motru"
- University of Medicine and Pharmacy of Iaşi-Grigore T. Popa
- Socola Clinical Psychiatric Hospital, Iaşi

**Mentor:** Pim Cuijpers

**Institution:** University of Amsterdam, Netherlands

Region: **North - West**

Performance:

Final Score: **90** points
