FAIR-IMPACT support

National Roadshow in Romania

Joy Davidson, DCC

Austria

FAIR-enabling support activities

- Dedicated guidance and in-kind support (Route 1)
- Financial support to test specific tools, approaches and solutions (Route 2)
- Series of public FAIR Implementation workshops (Route 3)

- Five open calls for support launched so far

121 teams of 285 participants supported through financial and in-kind support

Supporting you on your FAIR-enabling journey

The availability of data that are findable, accessible, interoperable and reusable (FAIR) lies at the heart of the European Open Science Cloud (EOSC) vision. FAIR is not a binary concept and cannot be achieved by any single action or actor. Instead, FAIR is a shared journey involving several stakeholders over the entire research lifecycle.

Researchers play a key role in making their outputs FAIR. The organisations who employ them, the funding bodies that financially support and influence the way they work, the research support staff who assist them, and the range of infrastructures used to create, share and curate their outputs also play critical roles. To help foster a FAIR ecosystem, FAIR-IMPACT will support three key stakeholder groups - **research performing organisations**, **repositories and data services providers**, and **national level initiatives** - to begin or progress their FAIR-enabling journeys. Through our series of open calls, FAIR-IMPACT raises awareness and supports the uptake of existing and emerging tools, solutions and approaches that have been developed through recently completed and ongoing European Commission INFRAEOSC projects and international initiatives such as the Research Data Alliance.

FAIR-IMPACT provides three support routes to help you become more FAIR-enabling.

https://fair-impact.eu/fair-impact-open-calls-support

Final open call launched on 30 September 2024

#1: Managing data types, schemas and vocabularies and crosswalks for FAIR related metadata

#2: Creating EOSC compliant interoperability policies based on EOSC IF

#3: Testing the trustworthy and FAIR-enabling repositories prototype

#4: Implementation of a shared API for semantic catalogues

FAIR-IMPACT

What we will provide

- A **dedicated, tailored support package**, including virtual workshops, expert guidance and advice from FAIR-IMPACT project partners and resource providers to enable participants to **implement the particular tool or approach**.
- **Financial support** to enable participation, payable by invoice upon successful completion of the support action.[1] The exact amount of the financial support that will be provided will vary across the support actions as it is based on the number of days required to participate. In most cases, participation in support actions will require between 5-10 days of effort from participants spread over a 1-2 month period. Funds may be used solely for supporting staff time to carry out relevant support action activities (participating in the virtual webinars, carrying out homework, completing exit questionnaire and/or interview, etc.).
- The opportunity to share their knowledge and learn from their peers through the **virtual workshops**.
- The opportunity to promote their work via a published **FAIR-IMPACT Implementation Story**.

❑ **Support package including virtual workshops, guidance and advice from mentors (starting in January 2025 and wunning to April 2025)**
❑ **Financial support to enable participation (based on a flat rate of 500 euros per day)**
❑ **Opportunity to share knowledge and learn from peers**
