projects

Europe's Beating Cancer Plan Highlights to expect in 2023

► EARLY DETECTION

- ✓ Towards gastric cancer screening implementation in the European Union (TOGAS project)
- ✓ Prostate cancer Awareness and Initiative for Screening in EU (PRAISE-U project)
- ✓ Strengthening the screening of Lung Cancer in Europe' (SOLACE project)

► QUALITY OF LIFE OF CANCER PATIENTS AND SURVIVORS

- ✓ Commission Communication on Mental Health
- ✓ Smart Card Application improving Cancer Survivors' Quality of Life (SmartCARE project)

► DIAGNOSIS AND TREATMENT

- ✓ Partnership on Transforming Health and Care Systems (THCS)
- ✓ Partnership on Personalised Medicine

► PREVENTION

- ✓ Proposal for a Council Recommendation on vaccine preventable cancers
- ✓ Proposal to update the Council Recommendation on smoke-free environments
- ✓ Vaccinating Europe to protect against the cancers caused by HPV (PROTECT-EUROPE project)
- ✓ Rethink and Reduce inequalities in HPV vaccination (ReThinkHPVvaccination project)

RETHINK VACCINATION

Box 4. The Europe's Beating Cancer Plan should inspire new proposals in Romania

The European Commission's Europe's Beating Cancer Plan is dedicated to enhancing the prevention, detection, treatment and management of cancer, while also reducing inequalities between and within Member States. It takes a patient-centred approach and makes the case for cancer to be addressed in a holistic manner.

There is an expectation that, considering the current state of cancer care in Romania, the Cancer Plan will spur a series of new proposals. The European funds allocated for the Plan are to be used at the national level, following the pay-for-value principle.
